

1. PDRN Skin Repair Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: Supports skin repair, improves skin texture & hydration, helps strengthen the skin barrier

Product Description:

The Great Herbal's **PDRN Skin Repair Face Serum** is a lightweight, advanced skincare formulation created for brands looking to develop next-generation skin repair and rejuvenation products. Powered by **PDRN (Polydeoxyribonucleotide)**, the serum is designed to support the skin's natural renewal process while helping improve the appearance of rough, tired, and stressed skin. Its lightweight texture absorbs comfortably into the skin, making it suitable for daily skincare routines focused on hydration, smoother texture, and a healthy-looking complexion.

The formulation can be customized with complementary ingredients such as **Hyaluronic Acid, Niacinamide, Panthenol, Centella Asiatica, and Ceramides** to create targeted skin repair and barrier-support formulas. Whether you are launching a premium regenerative skincare range, post-procedure-inspired beauty line, or an advanced anti-ageing collection, The Great Herbal offers flexible formulation and private-label manufacturing solutions to match your brand requirements. **Want to launch a premium PDRN skincare product? Connect with The Great Herbal today and bring your formulation concept to life.**

Turnkey Manufacturing — Advanced Manufacturing Support for Next-Generation Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **PDRN Skin Repair Face Serum** from formulation development to finished, market-ready products. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production environments. Our automated mixing and emulsification units help maintain consistency, while **high-shear homogenizers** support smooth and stable serum textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility is equipped with **in-house QC & Microbiology labs**, including pH meters, viscometers, microbial testing, and stability chambers for quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient production. We also provide **packaging design support and compliance management**, helping brands streamline the journey from product development to final delivery. With timely delivery across India and

support for **export-ready batches**, The Great Herbal offers a reliable manufacturing partner for brands building innovative skincare products.

Ingredients: PDRN (Polydeoxyribonucleotide), Hyaluronic Acid, Niacinamide, Panthenol, Centella Asiatica Extract, Ceramides

2. Vitamin C Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: Brightens dull-looking skin, supports an even skin tone, helps protect skin from environmental stressors

Product Description:

The Great Herbal's **Vitamin C Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch effective brightening and antioxidant-focused skincare products. Enriched with **Vitamin C**, the serum helps improve the appearance of dull skin, supports a more even-looking complexion, and promotes a fresh, radiant appearance. Its lightweight texture makes it easy to incorporate into everyday skincare routines and premium face care collections.

The formulation can be customized with complementary ingredients such as **Niacinamide, Hyaluronic Acid, Ferulic Acid, Vitamin E, and Licorice Extract** to create targeted skincare solutions for different consumer needs. Whether you are building a brightening range, antioxidant skincare collection, or premium facial serum line, The Great Herbal offers flexible formulation development and private-label manufacturing options to match your brand requirements. **Want to launch your own Vitamin C Face Serum? Connect with The Great Herbal today and turn your skincare concept into a market-ready product.**

Turnkey Manufacturing — Complete Manufacturing Support for High-Performance Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **Vitamin C Face Serum** from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production environments. Our automated mixing and emulsification units help maintain consistency and quality, while **high-shear homogenizers** support smooth and stable serum textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility includes **in-house QC & Microbiology labs** equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated

filling, capping, labeling, and coding lines help ensure efficient and consistent production. We also provide **packaging design support and compliance management**, making the manufacturing process simpler for growing brands. With timely delivery across India and support for **export-ready batches**, The Great Herbal is a reliable manufacturing partner for brands looking to build and scale their Vitamin C skincare range.

Ingredients: Vitamin C, Vitamin E, Ferulic Acid, Niacinamide, Hyaluronic Acid, Licorice Extract

3. Niacinamide Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Oil Control, Pore Minimizing, Skin Brightening**

Product Description:

The Great Herbal's **Niacinamide Face Serum** is a lightweight, fast-absorbing skincare formula developed for brands looking to launch effective solutions for oily, uneven, and blemish-prone skin. Powered by **Niacinamide (Vitamin B3)**, it helps manage excess oil, improve the appearance of enlarged pores, support a healthy skin barrier, and promote a smoother, more balanced-looking complexion. Its non-greasy texture makes it suitable for everyday skincare routines and a wide range of skin types.

The formulation can be customized with complementary ingredients such as **Hyaluronic Acid, Zinc PCA, Salicylic Acid, Alpha Arbutin, and Licorice Extract** to create targeted skincare solutions for different consumer needs. Whether you are launching an oil-control serum, brightening skincare range, or daily skin barrier collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Niacinamide Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Complete Manufacturing Support for Advanced Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **Niacinamide Face Serum** from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production environments. Our automated mixing and emulsification units help maintain consistency and quality, while **high-shear homogenizers** support smooth and stable serum textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility includes **in-house QC & Microbiology labs** equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** ensure efficient production. We also provide **packaging design support and compliance management**, making the manufacturing process simpler for growing brands. With timely delivery across India and support for **export-ready batches**, The Great Herbal is a reliable manufacturing partner for brands looking to develop and scale their skincare range.

Ingredients: Niacinamide, Hyaluronic Acid, Zinc PCA, Salicylic Acid, Alpha Arbutin, Licorice Extract

4. Hyaluronic Acid Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Deep Hydration, Skin Plumping, Moisture Lock**

Product Description:

The Great Herbal's **Hyaluronic Acid Face Serum** is a lightweight, fast-absorbing skincare formula designed for brands looking to launch effective hydration-focused products. Enriched with **Hyaluronic Acid**, the serum helps attract and retain moisture in the skin, supporting a smoother, softer, and more plump-looking complexion. Its refreshing, non-greasy texture makes it easy to add to daily skincare routines and suitable for a wide range of skin types.

The formulation can be customized with complementary ingredients such as **Niacinamide, Vitamin C, Ceramides, Panthenol, and Aloe Vera Extract** to create targeted hydration and skin barrier support solutions. Whether you are launching a hydrating skincare range, premium facial serum collection, or daily moisture care line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Hyaluronic Acid Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Complete Manufacturing Support for Advanced Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **Hyaluronic Acid Face Serum** from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production environments. Our automated mixing and emulsification units help maintain consistency and quality, while **high-shear homogenizers** support smooth and stable serum

textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility includes **in-house QC & Microbiology labs** equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent production. We also provide **packaging design support and compliance management**, making the manufacturing process simpler for growing brands. With timely delivery across India and support for **export-ready batches**, The Great Herbal is a reliable manufacturing partner for brands looking to develop and scale their skincare range.

Ingredients: Hyaluronic Acid, Niacinamide, Vitamin C, Ceramides, Panthenol, Aloe Vera Extract

6. Salicylic Acid Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Pore Care, Oil Control, Acne Care**

Product Description:

The Great Herbal's **Salicylic Acid Face Serum** is a lightweight, fast-absorbing skincare formula developed for brands looking to launch targeted solutions for oily, blemish-prone, and congested skin. Powered by **Salicylic Acid**, the serum helps exfoliate dead skin cells, clear excess oil, and improve the appearance of clogged pores for a smoother and more refined-looking complexion. Its lightweight texture makes it easy to include in modern skincare routines focused on clearer, healthier-looking skin.

The formulation can be customized with complementary ingredients such as **Niacinamide, Zinc PCA, Tea Tree Oil, Hyaluronic Acid, and Centella Asiatica Extract** to create targeted solutions for different skin concerns. Whether you are launching an acne care range, oil-control skincare collection, or pore-refining serum, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Salicylic Acid Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Complete Manufacturing Support for Advanced Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **Salicylic Acid Face Serum** from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with

AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters for controlled production environments. Our automated mixing and emulsification units help maintain consistency and quality, while **high-shear homogenizers** support smooth and stable serum textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility includes **in-house QC & Microbiology labs** equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent production. Ingredients: Salicylic Acid, Niacinamide, Zinc PCA, Tea Tree Oil, Hyaluronic Acid, Centella Asiatica Extract

7. Alpha Arbutin Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Dark Spot Care, Skin Brightening, Even Tone**

Product Description:

The Great Herbal's **Alpha Arbutin Face Serum** is a lightweight, fast-absorbing skincare formula developed for brands looking to launch targeted brightening and pigmentation-care products. Powered by **Alpha Arbutin**, the serum helps improve the appearance of dark spots, uneven skin tone, and dull-looking skin for a more balanced and radiant-looking complexion. Its smooth, non-greasy texture makes it easy to incorporate into daily skincare routines and premium brightening collections.

The formulation can be customized with complementary ingredients such as **Niacinamide, Vitamin C, Hyaluronic Acid, Licorice Extract, and Kojic Acid** to create targeted solutions for different skincare needs. Whether you are launching a pigmentation-care range, brightening skincare collection, or premium face serum line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Alpha Arbutin Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Complete Manufacturing Support for Advanced Skincare Brands

At **The Great Herbal**, we provide end-to-end turnkey manufacturing solutions that help brands take their **Alpha Arbutin Face Serum** from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production environments. Our automated mixing and emulsification units help maintain consistency and quality, while **high-shear homogenizers** support smooth and stable serum textures. **Vacuum processing** helps reduce air entrapment and supports formulation stability and shelf life.

Our facility includes **in-house QC & Microbiology labs** equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent production. We also provide **packaging design support and compliance management**, making the manufacturing process simpler for growing brands. With timely delivery across India and support for **export-ready batches**, The Great Herbal is a reliable manufacturing partner for brands looking to develop and scale their skincare range.

Ingredients: Alpha Arbutin, Niacinamide, Vitamin C, Hyaluronic Acid, Licorice Extract, Kojic Acid

8. Kojic Acid Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Dark Spot Care, Brightening, Even Tone**

Product Description:

The Great Herbal's **Kojic Acid Face Serum** is a lightweight, fast-absorbing skincare formulation created for brands looking to develop effective brightening and uneven skin tone care products. Powered by **Kojic Acid**, the serum helps improve the appearance of dark spots and pigmentation while supporting a more even and radiant-looking complexion. Its smooth texture makes it easy to incorporate into daily skincare routines and premium facial care ranges designed for consumers seeking targeted skin brightening solutions.

The formulation can be customized with complementary ingredients such as **Alpha Arbutin, Niacinamide, Vitamin C, Licorice Extract, and Hyaluronic Acid** to create differentiated brightening and pigmentation-care solutions. Whether you are building a targeted dark spot serum, a complete brightening collection, or a premium facial skincare range, The Great Herbal offers flexible formulation development and private-label manufacturing to suit your brand vision. **Want to launch your own Kojic Acid Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Advanced Brightening Skincare

At **The Great Herbal**, we support brands with complete turnkey manufacturing for **Kojic Acid Face Serum**, helping transform a formulation concept into a finished product ready for your market. Our **GMP & ISO-Certified Facility** is designed for globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms and 0.3-micron HEPA filters** supporting controlled production conditions. Automated mixing and emulsification systems help achieve consistent batches, while high-shear homogenizers are used to develop smooth, uniform serum textures. Our manufacturing approach can also be tailored to the specific formulation and packaging requirements of modern brightening skincare brands.

Quality control is supported by our **in-house QC & Microbiology labs**, with facilities including pH meters, viscometers, microbial testing, and stability chambers. **Cold storage** helps maintain the quality and potency of sensitive formulation ingredients, while fully automated **filling, capping, labeling, and coding lines** support efficient production and consistent finishing. From **packaging design support and compliance management** to timely delivery across India and **export-ready batches**, The Great Herbal provides an integrated manufacturing solution for brands looking to build and scale their brightening skincare portfolio.

Ingredients: Kojic Acid, Alpha Arbutin, Niacinamide, Vitamin C, Licorice Extract, Hyaluronic Acid

9. Peptide Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Firming Care, Fine Line Care, Skin Renewal**

Product Description:

The Great Herbal's **Peptide Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch advanced anti-ageing and skin-firming solutions. Enriched with **Peptides**, the serum is designed to support the appearance of firmer, smoother, and more youthful-looking skin while helping improve the look of fine lines and uneven texture. Its elegant texture makes it suitable for daily skincare routines and premium anti-ageing product ranges.

The formulation can be customized with complementary ingredients such as **Hyaluronic Acid, Niacinamide, Vitamin C, Ceramides, and Adenosine** to create targeted solutions for hydration, skin firmness, and age-related skin concerns. Whether you are launching a premium anti-ageing serum, skin-firming range, or advanced facial skincare collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to suit your brand requirements. **Want to launch your own Peptide Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Advanced Production for Premium Anti-Ageing Skincare

At **The Great Herbal**, we offer complete turnkey manufacturing support for **Peptide Face Serum**, helping brands move efficiently from formulation development to finished, market-ready products. Our **GMP & ISO-Certified Facility** is equipped for globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** to maintain controlled production conditions. Automated mixing and emulsification units help deliver consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, making our manufacturing setup suitable for premium active-based skincare formulations.

Our **in-house QC & Microbiology labs** support quality-focused production with pH meters, viscometers, microbial testing, and stability chambers. **Cold storage** helps preserve sensitive active ingredients and maintain formulation potency, while fully automated **filling, capping, labeling, and coding lines** help ensure efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping simplify the journey from product development to launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides a complete manufacturing partnership for brands building and scaling advanced anti-ageing skincare ranges.

Ingredients: Peptides, Hyaluronic Acid, Niacinamide, Vitamin C, Ceramides, Adenosine

10. Anti-Aging Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Fine Line Care, Firming Care, Skin Renewal**

Product Description:

The Great Herbal's **Anti-Aging Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch advanced age-defying and skin-renewal products. Designed with a blend of powerful skincare actives, the serum helps improve the appearance of fine lines, uneven texture, and dull-looking skin while supporting a smoother, firmer, and more youthful-looking complexion. Its elegant texture makes it suitable for daily skincare routines and premium anti-ageing product collections.

The formulation can be customized with complementary ingredients such as **Retinol, Peptides, Hyaluronic Acid, Niacinamide, Vitamin C, and Ceramides** to create targeted solutions for different skin concerns and age groups. Whether you are launching a premium anti-ageing serum, firming skincare range, or advanced facial care collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Anti-Aging Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Advanced Age-Defying Skincare
At **The Great Herbal**, we provide complete turnkey manufacturing support for **Anti-Aging Face Serum**, helping brands develop and scale sophisticated skincare products from formulation to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth, uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, making our manufacturing capabilities suitable for active-rich anti-ageing formulations.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** ensure efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline their journey from product development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal offers reliable manufacturing support for brands building premium anti-ageing and advanced skincare portfolios.

Ingredients: Retinol, Peptides, Hyaluronic Acid, Niacinamide, Vitamin C, Ceramides

11. Acne Control Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Acne Care, Oil Control, Pore Care**

Product Description:

The Great Herbal's **Acne Control Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to create targeted solutions for acne-prone, oily, and blemish-prone skin. The formula can be designed with effective ingredients such as **Salicylic Acid** to help exfoliate dead skin cells and clear clogged pores, while supporting a cleaner, smoother, and more balanced-looking complexion. Its non-greasy texture makes it suitable for daily skincare routines focused on managing excess oil and visible blemishes.

The formulation can be customized with complementary ingredients such as **Niacinamide, Zinc PCA, Tea Tree Oil, Centella Asiatica, and Hyaluronic Acid** to develop differentiated acne-care solutions for various consumer needs. Whether you are launching an acne-control serum, blemish-care range, or complete skincare collection for oily skin, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Acne Control Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Targeted Acne-Care Skincare

At **The Great Herbal**, we provide end-to-end turnkey manufacturing support for **Acne Control Face Serum**, helping brands transform their product concepts into market-ready skincare solutions. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing, with **AHU/HVAC-controlled cleanrooms featuring 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized serum solutions according to your brand's product requirements.

Our **in-house QC & Microbiology labs** feature pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** enable efficient and consistent product finishing. We also offer **packaging design support and compliance management**, helping simplify the journey from formulation development to final product delivery. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their acne-care and blemish-control skincare ranges.

Ingredients: Salicylic Acid, Niacinamide, Zinc PCA, Tea Tree Oil, Centella Asiatica Extract, Hyaluronic Acid

12. Skin Brightening Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Skin Brightening, Dark Spot Care, Even Tone**

Product Description:

The Great Herbal's **Skin Brightening Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch targeted solutions for dullness, uneven skin tone, and visible dark spots. Enriched with a carefully selected blend of brightening actives, the serum helps improve the appearance of pigmentation and supports a more even, radiant-looking complexion. Its smooth, non-greasy texture makes it suitable for daily skincare routines and modern brightening product ranges.

The formulation can be customized with complementary ingredients such as **Alpha Arbutin, Niacinamide, Vitamin C, Kojic Acid, Licorice Extract, and Hyaluronic Acid** to create differentiated solutions for various skin brightening needs. Whether you are launching a targeted pigmentation serum, daily brightening range, or premium facial skincare collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to

match your brand requirements. **Want to launch your own Skin Brightening Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Advanced Brightening Skincare

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Skin Brightening Face Serum**, helping brands develop customized skincare products from initial formulation to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to manufacture brightening serums according to your product specifications.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. Ingredients: Vitamin C, Niacinamide, Alpha Arbutin, Hyaluronic Acid, Licorice Extract, Vitamin E

15. Dark Spot Removal Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Dark Spot Care, Brightening, Even Tone**

Product Description:

The Great Herbal's **Dark Spot Removal Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch targeted solutions for dark spots, pigmentation, and uneven-looking skin tone. Designed with effective brightening ingredients, the serum helps improve the appearance of visible discoloration while supporting a smoother, brighter, and more balanced-looking complexion. Its lightweight, non-greasy texture makes it suitable for daily skincare routines and targeted pigmentation-care product ranges.

The formulation can be customized with complementary ingredients such as **Alpha Arbutin, Niacinamide, Kojic Acid, Vitamin C, Licorice Extract, and Hyaluronic Acid** to create differentiated solutions for various skin brightening and pigmentation concerns. Whether you are launching a targeted dark spot serum, pigmentation-care range, or premium brightening skincare collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Dark Spot Removal Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Targeted Pigmentation-Care Skincare

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Dark Spot Removal Face Serum**, helping brands develop customized pigmentation-care products from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to manufacture targeted brightening formulas according to your brand's product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from product development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their pigmentation-care and brightening skincare portfolio.

Ingredients: Alpha Arbutin, Niacinamide, Kojic Acid, Vitamin C, Licorice Extract, Hyaluronic Acid

16. Pigmentation Repair Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement

- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Pigmentation Care, Skin Brightening, Even Tone**

Product Description:

The Great Herbal's **Pigmentation Repair Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch targeted solutions for uneven skin tone, visible pigmentation, and dull-looking skin. Designed with a carefully selected combination of brightening and skin-supporting ingredients, the serum helps improve the appearance of dark areas and supports a more balanced, radiant-looking complexion. Its smooth, non-greasy texture makes it suitable for everyday skincare routines and advanced pigmentation-care product ranges.

The formulation can be customized with complementary ingredients such as **Alpha Arbutin, Niacinamide, Kojic Acid, Vitamin C, Licorice Extract, and Hyaluronic Acid** to create differentiated solutions for various skin concerns. Whether you are launching a pigmentation-care serum, brightening skincare range, or premium facial treatment collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Pigmentation Repair Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Advanced Pigmentation-Care Skincare

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Pigmentation Repair Face Serum**, helping brands transform their product concepts into customized, market-ready skincare solutions. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized pigmentation-care formulas according to your brand's product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from formulation development to final delivery. Ingredients: Alpha Arbutin, Niacinamide, Kojic Acid, Vitamin C, Licorice Extract, Hyaluronic Acid

17. Oil Control Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Oil Control, Pore Care, Shine Control**

Product Description:

The Great Herbal's **Oil Control Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to create targeted solutions for oily, combination, and blemish-prone skin. Designed with effective oil-balancing ingredients, the serum helps manage excess sebum and reduce the appearance of unwanted shine while supporting a smoother, fresher, and more balanced-looking complexion. Its non-greasy texture makes it suitable for daily skincare routines and modern skincare ranges focused on oil management and pore care.

The formulation can be customized with complementary ingredients such as **Niacinamide, Zinc PCA, Salicylic Acid, Tea Tree Oil, Hyaluronic Acid, and Green Tea Extract** to create differentiated solutions for various oily-skin concerns. Whether you are launching an oil-control serum, pore-care collection, or complete skincare range for oily and combination skin, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Oil Control Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Oil-Balancing Skincare Solutions

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Oil Control Face Serum**, helping brands develop customized sebum-control products from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to manufacture customized oil-control formulas according to your brand's product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from formulation development to market launch. With timely delivery across India and

support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their oil-control, pore-care, and blemish-focused skincare portfolio.

Ingredients: Niacinamide, Zinc PCA, Salicylic Acid, Tea Tree Oil, Hyaluronic Acid, Green Tea Extract

18. Sensitive Skin Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Skin Soothing, Barrier Care, Deep Hydration**

Product Description:

The Great Herbal's **Sensitive Skin Face Serum** is a lightweight, gentle skincare formulation developed for brands looking to create calming and hydrating solutions for sensitive and easily irritated skin. Designed with skin-soothing and barrier-supporting ingredients, the serum helps comfort the appearance of stressed skin while supporting moisture balance and a smoother, healthier-looking complexion. The formula can be developed with a mild, non-greasy texture and customized to meet the needs of sensitive-skin-focused skincare ranges.

The formulation can be customized with complementary ingredients such as **Hyaluronic Acid, Panthenol, Centella Asiatica, Ceramides, Aloe Vera, and Allantoin** to create targeted solutions for hydration, soothing care, and skin barrier support. Whether you are launching a sensitive skin serum, calming skincare collection, or gentle daily facial care range, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Sensitive Skin Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Gentle & Barrier-Support Skincare

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Sensitive Skin Face Serum**, helping brands develop gentle, customized skincare products from formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop carefully balanced formulas according to your brand's sensitive-skin product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps

preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale gentle, soothing, and skin barrier-focused skincare ranges.

Ingredients: Hyaluronic Acid, Panthenol, Centella Asiatica Extract, Ceramides, Aloe Vera Extract, Allantoin

19. Multi-Purpose Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Hydration, Brightening, Skin Renewal**

Product Description:

The Great Herbal's **Multi-Purpose Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to offer a versatile product that addresses multiple everyday skin concerns in one formula. Designed with a balanced blend of hydrating, brightening, and skin-supporting ingredients, the serum helps improve the appearance of dullness, uneven texture, and dryness while promoting a smoother, healthier, and more radiant-looking complexion. Its lightweight, non-greasy texture makes it easy to include in daily skincare routines and multi-benefit facial care ranges.

The formulation can be customized with complementary ingredients such as **Niacinamide, Hyaluronic Acid, Vitamin C, Alpha Arbutin, Peptides, and Panthenol** to create a multifunctional serum tailored to your target audience. Whether you are launching an everyday skincare essential, all-in-one facial serum, or premium multi-benefit skincare collection, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Multi-Purpose Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Flexible Production for Multi-Benefit Skincare Formulations

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Multi-Purpose Face Serum**, helping brands develop versatile skincare formulations from product concept and formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain batch consistency, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation

stability, allowing us to develop customized multi-benefit formulas according to your brand's product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale versatile, multi-benefit skincare portfolios.

Ingredients: Niacinamide, Hyaluronic Acid, Vitamin C, Alpha Arbutin, Peptides, Panthenol

20. Barrier Repair Face Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Barrier Repair, Deep Hydration, Skin Soothing**

Product Description:

The Great Herbal's **Barrier Repair Face Serum** is a lightweight, fast-absorbing skincare formulation developed for brands looking to launch products focused on skin barrier support, hydration, and soothing care. Designed with skin-supporting ingredients, the serum helps replenish moisture and improve the appearance of dry, stressed, or moisture-depleted skin while supporting a smoother, softer, and healthier-looking complexion. Its gentle, non-greasy texture makes it suitable for daily skincare routines and modern barrier-focused product ranges.

The formulation can be customized with complementary ingredients such as **Ceramides, Hyaluronic Acid, Panthenol, Niacinamide, Squalane, and Centella Asiatica Extract** to create targeted solutions for hydration, soothing, and skin barrier care. Whether you are launching a barrier repair serum, sensitive skin collection, or premium daily hydration range, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Barrier Repair Face Serum? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — Specialized Production for Skin Barrier & Hydration Care

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Barrier Repair Face Serum**, helping brands develop customized formulations from product concept and formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units

help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to manufacture carefully balanced barrier-support formulas according to your brand's product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping brands streamline the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale skin barrier, hydration, and sensitive-skin care portfolios.

Ingredients: Ceramides, Hyaluronic Acid, Panthenol, Niacinamide, Squalane, Centella Asiatica Extract

Hair Serum Manufacturer

Hair Growth Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Hair Growth, Scalp Care, Root Strength**

Product Description:

The Great Herbal's **Hair Growth Serum** is a lightweight, non-greasy hair and scalp care formulation developed for brands looking to launch targeted solutions for weak, thinning, and stressed hair. Designed with a blend of hair-supporting and scalp-nourishing ingredients, the serum helps create a healthy scalp environment while supporting stronger-looking roots and healthier-looking hair. Its easy-to-apply texture makes it suitable for regular scalp care routines and modern hair growth product ranges.

The formulation can be customized with complementary ingredients such as **Redensyl, Anagain, Biotin, Caffeine, Peptides, and Rosemary Extract** to create targeted solutions for different hair and scalp care needs. - Benefits: **Hair Growth, Root Support, Scalp Care**

Product Description:

The Great Herbal's **Procapil Hair Serum** is a lightweight, non-greasy hair and scalp care formulation developed for brands looking to launch advanced solutions for weak, thinning, and stressed-looking hair. Enriched with **Procapil**, the serum is designed to support scalp wellness and healthier-looking hair while helping maintain stronger-looking roots. Its easy-to-apply texture makes it suitable for regular scalp care routines and modern hair growth and hair strengthening product ranges.

The formulation can be customized with complementary ingredients such as **Redensyl, Anagain, Caffeine, Biotin, Peptides, and Rosemary Extract** to create differentiated solutions for various hair and scalp care needs. Whether you are launching a Procapil hair serum, hair growth range, anti-hair fall collection, or premium scalp care line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Procapil Hair Serum? Connect with The Great Herbal today and bring your hair care concept to market.**

Turnkey Manufacturing — Specialized Production for Advanced Hair Growth & Scalp Care

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Procapil Hair Serum**, helping brands develop customized active-based hair and scalp formulations from product concept to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized Procapil-based hair care formulas according to your brand's specific requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps

preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping simplify the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their hair growth, anti-hair fall, and advanced scalp care portfolios.

Ingredients: Procapil, Redensyl, Anagain, Caffeine, Biotin, Peptides, Rosemary Extract

9. Anagain Hair Serum Third-Party Manufacturer

Ingredients: Keratin, Argan Oil, Hydrolyzed Silk Protein, Panthenol, Vitamin E, Jojoba Oil

18. Heat Protection Hair Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Heat Protection, Damage Care, Frizz Control**

Product Description:

The Great Herbal's **Heat Protection Hair Serum** is a lightweight, non-greasy hair care formulation developed for brands looking to launch targeted solutions for hair exposed to heat styling tools such as straighteners, curling irons, and blow dryers. Designed with protective, conditioning, and smoothing ingredients, the serum helps reduce the appearance of dryness, roughness, and frizz while supporting smoother, more manageable, and healthier-looking hair. Its easy-to-apply texture makes it suitable for regular styling routines and modern heat-protection and damage-care product ranges.

The formulation can be customized with complementary ingredients such as **Keratin, Argan Oil, Hydrolyzed Silk Protein, Panthenol, Vitamin E, and Jojoba Oil** to create differentiated solutions for various hair types and styling needs. Whether you are launching a heat protection serum, thermal protection range, anti-frizz collection, or premium styling care line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Heat Protection Hair Serum? Connect with The Great Herbal today and bring your hair care concept to market.**

Turnkey Manufacturing — Specialized Production for Heat-Styling & Damage Protection Hair Care

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Heat Protection Hair Serum**, helping brands develop customized hair care formulations designed for modern heat-styling routines. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized heat-protection and styling formulas according to your brand's specific product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping simplify the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions

for brands looking to develop and scale their heat protection, anti-frizz, damage-care, and premium hair styling portfolios.

Ingredients: Keratin, Argan Oil, Hydrolyzed Silk Protein, Panthenol, Vitamin E, Jojoba Oil

19. Anti-Grey Hair Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Grey Hair Care, Scalp Nourishment, Hair Strength**

Product Description:

The Great Herbal's **Anti-Grey Hair Serum** is a lightweight, non-greasy hair and scalp care formulation developed for brands looking to launch targeted solutions for premature greying and overall hair wellness. Designed with hair-supporting and scalp-nourishing ingredients, the serum helps maintain a healthy scalp environment while supporting stronger, healthier-looking hair. Its easy-to-apply texture makes it suitable for regular scalp care routines and modern hair wellness ranges focused on grey hair care and pigmentation support.

The formulation can be customized with complementary ingredients such as **Catalase, Biotin, Copper Peptides, Caffeine, Rosemary Extract, and Amla Extract** to create differentiated solutions for various hair and scalp care needs. Whether you are launching an anti-grey hair serum, premature grey hair care range, scalp wellness collection, or premium hair care line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Anti-Grey Hair Serum? Connect with The Great Herbal today and bring your hair care concept to market.**

Turnkey Manufacturing — Specialized Production for Grey Hair & Scalp Wellness Care

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Anti-Grey Hair Serum**, helping brands develop customized hair and scalp care formulations from product concept and formulation development to final delivery. Turnkey Manufacturing — Specialized Production for Scalp Nourishment & Hair Wellness

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Scalp Nourishing Hair Serum**, helping brands develop customized hair and scalp care formulations from product concept and formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized scalp nourishing formulas according to your brand's specific product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping simplify the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their scalp nourishment, root care, hydration, and premium hair wellness portfolios.

Ingredients: Panthenol, Niacinamide, Hyaluronic Acid, Aloe Vera Extract, Rosemary Extract, Peptides

21. Multi-Benefit Hair Serum Third-Party Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Hair Growth, Hair Strength, Frizz Control**

Product Description:

The Great Herbal's **Multi-Benefit Hair Serum** is a lightweight, non-greasy hair and scalp care formulation developed for brands looking to offer multiple hair care benefits in one versatile product. Designed with a balanced combination of hair-supporting, nourishing, and smoothing ingredients, the serum helps improve the appearance of weak, dry, frizzy, and difficult-to-manage hair while supporting healthier-looking roots and scalp. Its easy-to-apply texture makes it suitable for daily hair care routines and modern multi-benefit hair wellness product ranges.

The formulation can be customized with complementary ingredients such as **Redensyl, Procapil, Biotin, Keratin, Peptides, and Argan Oil** to create a multifunctional solution tailored to your target audience and product positioning. Whether you are launching an all-in-one hair serum, hair growth range, strengthening collection, or premium multi-benefit hair care line, The Great Herbal offers flexible formulation development and private-label manufacturing solutions to match your brand requirements. **Want to launch your own Multi-Benefit Hair Serum? Connect with The Great Herbal today and bring your hair care concept to market.**

Turnkey Manufacturing — Flexible Production for Multi-Benefit Hair Care Solutions

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Multi-Benefit Hair Serum**, helping brands develop versatile hair and scalp care formulations from product concept and formulation development to final delivery. Our **GMP & ISO-Certified Facility** supports globally compliant manufacturing and features **AHU/HVAC-controlled cleanrooms with 0.3-micron HEPA filters** for controlled production conditions. Automated mixing and

emulsification units help maintain consistent batches, while **high-shear homogenizers** support smooth and uniform serum textures. **Vacuum processing** helps minimize air entrapment and supports formulation stability, allowing us to develop customized multi-benefit formulas according to your brand's specific product requirements.

Our **in-house QC & Microbiology labs** are equipped with pH meters, viscometers, microbial testing, and stability chambers to support quality-focused production. **Cold storage** helps preserve sensitive active ingredients and formulation potency, while fully automated **filling, capping, labeling, and coding lines** support efficient and consistent product finishing. We also provide **packaging design support and compliance management**, helping simplify the journey from formulation development to market launch. With timely delivery across India and support for **export-ready batches**, The Great Herbal provides reliable manufacturing solutions for brands looking to develop and scale their multi-benefit, hair growth, strengthening, smoothing, and premium hair wellness portfolios.

Ingredients: Redensyl, Procapil, Biotin, Keratin, Peptides, Argan Oil

22. Redensyl + Procapil + Anagain Hair Growth Serum Manufacturer

- MOQ: 3000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Dropper Bottle or Pump Bottle
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Hair Growth, Root Support, Scalp Care**

Product Description:

The Great Herbal's **Redensyl + Procapil + Anagain Hair Growth Serum** is a lightweight, non-greasy hair and scalp care formulation developed for brands looking to launch an advanced solution for hair thinning, weak roots, and scalp care. Combining **Redensyl, Procapil, and Anagain**, this targeted formula is designed to support a healthy scalp environment and stronger-looking roots while promoting the appearance of healthier, fuller-looking hair. Its easy-to-apply texture makes it suitable for regular scalp care routines and premium hair growth and anti-hair fall product ranges.

The formulation can be customized with complementary ingredients such as **Caffeine, Biotin, Peptides, Rosemary Extract, Niacinamide, and Panthenol** to create differentiated solutions for various hair and scalp care needs. Ingredients: Peptides, Niacinamide, Panthenol, Hyaluronic Acid, Ceramides, Centella Asiatica Extract, Aloe Vera Extract

Soap Manufacturing Services (B2B)

1. **Vitamin C Soap Third-Party Manufacturer**

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Brightening, Skin Refreshing, Antioxidant Care**

Product Description:

The Great Herbal's **Vitamin C Soap** is a refreshing and skin-focused cleansing formulation developed for brands looking to launch premium brightening and antioxidant-based bathing products. Enriched with **Vitamin C**, the soap is designed to cleanse the skin while supporting a fresh, radiant, and healthier-looking appearance. Its carefully developed formulation can be suitable for everyday bathing routines and modern skincare ranges focused on skin freshness, brightness, and antioxidant care.

The formulation can be customized with complementary ingredients such as **Vitamin E, Aloe Vera Extract, Turmeric Extract, Papaya Extract, Licorice Extract, Glycerin, and Natural Oils** to create differentiated soap products for various skin care requirements. Whether you are launching a brightening soap, antioxidant soap, herbal-inspired bathing range, or premium skincare collection, The Great Herbal offers flexible formulation development and private-label soap manufacturing solutions to match your brand requirements. **Want to launch your own Vitamin C Soap? Connect with The Great Herbal today and bring your skincare concept to market.**

Turnkey Manufacturing — End-to-End Soap Manufacturing Solutions for Brands

At **The Great Herbal**, we provide complete turnkey manufacturing support for **Vitamin C Soap**, helping brands launch or scale their soap manufacturing production with end-to-end assistance. From product concept and formulation development to manufacturing, packaging, labeling, compliance support, and final delivery, our team manages the complete production journey according to your brand's requirements. Our **GMP & ISO-Certified Facility** supports quality-focused soap production and is equipped with modern manufacturing infrastructure designed to maintain consistency and efficiency across production batches.

Our manufacturing capabilities support the development of customized soap formulations with carefully selected active ingredients, botanical extracts, moisturizing agents, fragrances, and other functional components. Our **in-house QC & Microbiology labs** support quality-focused production through testing and monitoring, while our manufacturing processes are designed to deliver consistent product quality and finish. We also provide support for **packaging development, labeling, coding, and compliance management**, helping brands simplify the process of taking their soap products from concept to market.

Whether you are a startup launching your first soap range, an established beauty brand expanding its product portfolio, or a business looking to scale existing soap production, The Great Herbal provides comprehensive **third-party soap manufacturing, private-label soap manufacturing, and turnkey soap manufacturing solutions**. With support across product development, production, packaging, and final delivery, we help brands create and scale their **Vitamin C Soap** and other customized soap ranges for the Indian and international markets.

Ingredients: Vitamin C, Vitamin E, Aloe Vera Extract, Turmeric Extract, Papaya Extract, Licorice Extract, Glycerin, Natural Oils

2. Charcoal Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Deep Cleansing, Oil Control, Pore Purifying**

Product Description:

The Great Herbal's **Charcoal Soap** is a deep-cleansing bathing formulation developed for brands seeking to offer effective cleansing solutions for oily, combination, and impurity-prone skin. Formulated with **Activated Charcoal**, the soap helps cleanse away excess oil, dirt, and daily impurities from the skin, leaving it feeling fresh and thoroughly cleansed. Its purifying cleansing profile makes it a suitable addition to modern skincare and personal care collections designed around clean, refreshed, and balanced-looking skin.

Brands can customize the formulation with targeted ingredients such as **Tea Tree Oil, Salicylic Acid, Neem Extract, Green Tea Extract, Aloe Vera, Bentonite Clay, and Glycerin** to develop differentiated cleansing bars for specific consumer preferences. From detox-inspired bathing products and oil-control soaps to men's grooming collections and premium facial cleansing bars, The Great Herbal supports brands with customized formulation development and private-label soap manufacturing. **Planning to introduce your own Charcoal Soap range? Partner with The Great Herbal for reliable product development and manufacturing support from concept to finished product.**

Turnkey Manufacturing — Complete Support to Launch & Scale Your Soap Brand

At **The Great Herbal**, we help businesses transform their soap concepts into market-ready products through comprehensive **end-to-end soap manufacturing solutions**. Our turnkey approach is designed for brands that want to launch a new soap range or expand their existing production without managing multiple manufacturing and packaging partners. We coordinate key stages of the process, including formulation planning, ingredient selection, product development, batch manufacturing, quality checks, packaging, labeling, and final product dispatch.

Our **GMP & ISO-Certified manufacturing facility** is equipped to support efficient and consistent soap production for growing brands. Advanced production systems and controlled manufacturing processes help us maintain batch uniformity and product consistency across larger production requirements. Our dedicated **quality control and microbiology facilities** support product evaluation and quality monitoring, while our experienced manufacturing team works closely with brands to develop soap products that align with their desired texture, fragrance, appearance, cleansing profile, and market positioning.

From selecting suitable packaging formats and assisting with label requirements to coordinating production and finished-product delivery, we provide integrated support throughout the manufacturing lifecycle. Whether you are a new beauty entrepreneur, an established skincare company, a private-label retailer, or an expanding personal care brand, The Great Herbal offers flexible **third-party soap manufacturing and private-label soap production** solutions to help you build a scalable product portfolio. Our end-to-end approach enables brands to focus on marketing and business growth while we take care of the manufacturing journey behind their **Charcoal Soap** and customized soap products.

Ingredients: Activated Charcoal, Tea Tree Oil, Salicylic Acid, Neem Extract, Green Tea Extract, Aloe Vera, Bentonite Clay, Glycerin

3. **Neem & Tulsi Soap Third-Party Manufacturer**

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Purifying Cleansing, Skin Freshness, Oil Balance**

Product Description:

The Great Herbal's **Neem & Tulsi Soap** combines the traditional skin-purifying properties of **Neem Extract and Tulsi Extract** in a refreshing cleansing bar designed for everyday personal care. The formulation is developed for brands seeking to introduce botanical-inspired bathing products that help remove everyday dirt, excess oil, and impurities while leaving the skin feeling clean and refreshed. With its naturally inspired positioning, this soap can be developed for skincare, herbal-inspired personal care, and daily cleansing product ranges.

To create a distinctive product for your target market, the formulation can be customized with ingredients such as **Aloe Vera, Turmeric Extract, Tea Tree Oil, Green Tea Extract, Glycerin, Coconut Oil, and Essential Oils**. Brands can also explore different fragrance profiles, colors, soap textures, and packaging concepts to develop a product aligned with their market positioning. Whether you are planning a botanical cleansing bar, a daily-use personal care soap, or a premium natural-inspired bathing range, The Great Herbal provides customized formulation and private-label manufacturing support. **Looking to launch a Neem & Tulsi Soap under your**

own brand? Work with The Great Herbal to develop and manufacture a product tailored to your business requirements.

Turnkey Manufacturing — From Soap Concept to Market-Ready Product

Launching a successful soap range involves much more than simply manufacturing the finished bar. At **The Great Herbal**, we offer an integrated turnkey manufacturing model that brings together product development, formulation customization, raw material selection, production, quality assurance, packaging, labeling, and final dispatch. Our goal is to give brands a streamlined manufacturing experience while providing the flexibility needed to create soaps that match their product vision and target consumers.

Our **GMP & ISO-Certified Facility** is supported by dedicated manufacturing infrastructure for producing consistent and commercially scalable soap batches. Our technical team can assist with formulation development based on the desired cleansing experience, ingredient profile, fragrance, appearance, and positioning of the product. Throughout production, our **in-house QC & Microbiology labs** support quality monitoring and testing to help maintain consistency and reliability across manufacturing batches.

We also assist brands with **custom packaging solutions, labeling coordination, product coding, and compliance support**, helping simplify the transition from product development to finished goods. Our end-to-end service is suitable for startups entering the personal care market, established companies adding new soap variants, retailers developing private-label collections, and brands seeking to expand their manufacturing capacity. From the initial idea to the final packed product, The Great Herbal supports businesses looking to **launch, expand, or scale their soap manufacturing portfolio** with customized third-party manufacturing solutions.

Ingredients: Neem Extract, Tulsi Extract, Aloe Vera, Turmeric Extract, Tea Tree Oil, Green Tea Extract, Glycerin, Coconut Oil, Essential Oils

4. Turmeric Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Skin Cleansing, Radiance Support, Soothing Care**

Product Description:

The Great Herbal's **Turmeric Soap** is a botanical-inspired cleansing bar developed for brands looking to introduce traditional ingredient-led skincare into their personal care portfolio. Formulated with **Turmeric Extract**, this soap is designed to provide a refreshing cleansing experience while supporting a clean, smooth, and healthy-looking skin appearance. Its naturally inspired profile makes it suitable for brands developing daily bathing products, botanical skincare collections, and ingredient-focused personal care ranges.

The formulation can be tailored with complementary ingredients such as **Sandalwood Extract, Saffron Extract, Honey, Aloe Vera, Neem Extract, Licorice Extract, Coconut Oil, and Vitamin E** to create distinctive soap variants for different market segments. Brands can also customize the fragrance, color, texture, and overall formulation profile according to their product positioning. Whether you are developing a traditional-inspired bathing bar, a radiance-focused soap, or a premium botanical skincare product, The Great Herbal provides customized formulation and private-label manufacturing support. **Want to introduce a Turmeric Soap under your own brand? Connect with The Great Herbal to turn your product idea into a market-ready soap range.**

Turnkey Manufacturing — Integrated Soap Production Support for Growing Brands

At **The Great Herbal**, we make the soap manufacturing process easier for businesses by providing comprehensive support across the entire product lifecycle. Our turnkey manufacturing service is designed for brands that need a reliable partner to manage the journey from initial product planning to finished, packaged goods. We work with brands on formulation requirements, ingredient selection, manufacturing, quality checks, packaging coordination, labeling, and product dispatch, creating a coordinated production process under one manufacturing partner.

Our **GMP & ISO-Certified Facility** provides the infrastructure required to manufacture soap products with attention to batch consistency and production efficiency. Our formulation and production teams can work on customized soap concepts based on your desired ingredients, cleansing properties, fragrance profile, appearance, and consumer requirements. Dedicated quality processes, supported by our **in-house QC & Microbiology labs**, help monitor product quality throughout the manufacturing cycle.

Beyond production, our team provides assistance with **packaging development, label coordination, coding, and compliance management**, helping brands move efficiently toward commercial launch. Our end-to-end model is suitable for emerging businesses launching their first personal care products as well as established brands expanding into new soap categories or increasing their production volumes. Whether you want to build a specialized turmeric-based collection or add a new product to an existing skincare portfolio, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey solutions** to support your brand from concept development through final delivery.

Ingredients: Turmeric Extract, Sandalwood Extract, Saffron Extract, Honey, Aloe Vera, Neem Extract, Licorice Extract, Coconut Oil, Vitamin E

5. Aloe Vera Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available

- Turnkey Solutions: Available
- Benefits: **Gentle Cleansing, Skin Hydration, Soothing Care**

Product Description:

The Great Herbal's **Aloe Vera Soap** is a gentle and refreshing cleansing bar developed for brands seeking to create moisturizing and skin-comfort-focused personal care products. Enriched with **Aloe Vera Extract**, the formulation is designed to cleanse the skin while helping maintain a soft, refreshed, and comfortable skin feel. Its mild and hydrating profile makes it a versatile choice for everyday bathing and personal care collections targeting consumers who prefer botanical-inspired cleansing products.

Brands can customize the formulation with complementary ingredients such as **Shea Butter, Glycerin, Coconut Oil, Olive Oil, Vitamin E, Cucumber Extract, Green Tea Extract, and Chamomile Extract** to develop unique soap variants for different consumer preferences. The fragrance, color, texture, ingredient combination, and packaging can also be adapted to suit your brand identity and market positioning. Whether you are developing a moisturizing bathing bar, botanical soap collection, gentle cleansing range, or premium skincare product line, The Great Herbal offers flexible private-label and customized soap manufacturing solutions. **Ready to launch your own Aloe Vera Soap? Partner with The Great Herbal to develop a customized product that fits your brand and market requirements.**

Turnkey Manufacturing — Complete Soap Solutions from Development to Delivery

At **The Great Herbal**, we support brands with a complete approach to soap manufacturing, providing the expertise and resources required to bring a product from an initial concept to a finished market-ready bar. Our end-to-end service is built for businesses that want to launch new soap products or scale their existing manufacturing operations with the support of an experienced third-party manufacturer. We coordinate essential stages including product formulation, ingredient sourcing, manufacturing, quality evaluation, packaging, labeling, compliance assistance, and final product delivery.

Our **GMP & ISO-Certified Facility** is equipped to support the production of customized soap ranges with a focus on reliable manufacturing and batch-to-batch consistency. Our technical team works with brands to develop product specifications around cleansing performance, moisturizing properties, fragrance, appearance, and ingredient preferences. Quality monitoring is supported by our **in-house QC & Microbiology labs**, helping ensure that products are evaluated throughout the manufacturing process according to defined quality requirements.

We further assist brands with the practical aspects of bringing their products to market, including **packaging design support, label coordination, product coding, and compliance management**. Our turnkey model is suitable for startups, private-label businesses, established skincare companies, retailers, and beauty brands looking to expand their product portfolio or increase production capacity. From the first formulation discussion to the final packed soap, The Great Herbal provides a coordinated manufacturing journey that allows brands to focus on building their business while we support the production of their **Aloe Vera Soap** and customized personal care products.

Ingredients: Aloe Vera Extract, Shea Butter, Glycerin, Coconut Oil, Olive Oil, Vitamin E, Cucumber Extract, Green Tea Extract, Chamomile Extract

6. Kojic Acid Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Brightening Care, Uneven Tone Support, Skin Cleansing**

Product Description:

The Great Herbal's **Kojic Acid Soap** is a targeted cleansing bar developed for beauty and skincare brands looking to introduce ingredient-focused products into their personal care portfolio. Formulated with **Kojic Acid**, the soap is designed to cleanse the skin while supporting a more even-looking and radiant appearance. Its active-focused positioning makes it suitable for brands developing modern brightening, pigmentation-care, and tone-enhancing skincare ranges for consumers seeking specialized daily cleansing solutions.

The formulation can be customized with complementary ingredients such as **Alpha Arbutin, Licorice Extract, Vitamin C, Glutathione, Niacinamide, Papaya Extract, and Vitamin E** to create differentiated brightening soap formulations. Brands can also customize the product's fragrance, appearance, texture, packaging format, and overall ingredient profile to align with their target market and brand identity. Whether you are launching a specialized brightening bar, an active skincare soap, or a premium pigmentation-care collection, The Great Herbal provides flexible formulation development and private-label manufacturing support. **Planning to launch your own Kojic Acid Soap? Partner with The Great Herbal for customized product development and reliable third-party soap manufacturing.**

Turnkey Manufacturing — End-to-End Production for Specialized Soap Ranges

At **The Great Herbal**, we provide brands with a complete manufacturing pathway for developing and commercializing specialized soap products. Our end-to-end turnkey service is designed to support businesses at every stage, from defining the product concept and selecting suitable ingredients to formulation development, manufacturing, quality evaluation, packaging, labeling, and final dispatch. This integrated approach helps brands simplify their supply chain while maintaining greater control over their product specifications and market positioning.

Our **GMP & ISO-Certified Facility** supports the production of customized soap formulations with modern manufacturing infrastructure and quality-focused processes. Our technical teams work with brands to develop formulations based on their preferred active ingredients, cleansing characteristics, fragrance, appearance, and intended consumer profile. For active-based soap products, careful formulation planning and controlled production are important for achieving a consistent finished product. Our **in-house QC & Microbiology labs** support quality monitoring and product evaluation throughout the manufacturing process.

We also provide support beyond the manufacturing floor, helping brands coordinate **packaging solutions, label development, product coding, and compliance requirements** as part of the overall product launch process. Whether you are an emerging skincare entrepreneur, a private-label retailer, an established beauty company, or a growing personal care brand, our turnkey approach is designed to help you efficiently launch new products and expand your existing soap portfolio. From initial product development through finished-goods delivery, The Great Herbal provides comprehensive **third-party soap manufacturing, private-label soap production, and turnkey manufacturing solutions** for brands looking to build and scale their specialized skincare product ranges.

Ingredients: Kojic Acid, Alpha Arbutin, Licorice Extract, Vitamin C, Glutathione, Niacinamide, Papaya Extract, Vitamin E

7. Glutathione Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Skin Brightening, Radiance Support, Deep Cleansing**

Product Description:

The Great Herbal's **Glutathione Soap** is an ingredient-focused cleansing bar created for beauty brands seeking to develop modern skincare products with a brightening and radiance-oriented positioning. Enriched with **Glutathione**, the formulation is designed to provide an effective cleansing experience while supporting a fresh, luminous, and more even-looking skin appearance. Its premium active-ingredient profile makes it suitable for personal care brands developing specialized cleansing products for consumers interested in targeted skincare and daily skin radiance care.

The formulation can be customized with complementary ingredients such as **Kojic Acid, Alpha Arbutin, Niacinamide, Vitamin C, Licorice Extract, Papaya Extract, Turmeric Extract, and Vitamin E** to develop distinctive soap formulations for different market requirements. Brands can also select their preferred fragrance, color, texture, packaging style, and ingredient combinations to create a product that reflects their unique identity. Whether you are building a brightening soap collection, an active skincare range, or a premium beauty care portfolio, The Great Herbal provides customized formulation and private-label manufacturing solutions.

Looking to develop your own Glutathione Soap? Connect with The Great Herbal and turn your product concept into a customized, market-ready soap range.

Turnkey Manufacturing — Your Complete Partner for Soap Brand Development

At **The Great Herbal**, we work as an end-to-end manufacturing partner for businesses that want to introduce new soap products or expand their existing personal care portfolio. Our turnkey manufacturing model brings multiple stages of product creation together, allowing brands to

manage their soap production journey through a single experienced manufacturing partner. From the early stages of product planning and formulation development to production, quality assessment, packaging, labeling, and finished-product delivery, we provide coordinated support throughout the process.

Our **GMP & ISO-Certified Facility** is designed to support the manufacturing requirements of brands seeking consistent and scalable soap production. Our formulation specialists can help develop customized products based on the desired active ingredients, cleansing performance, fragrance, appearance, and consumer positioning. We focus on maintaining production consistency through controlled manufacturing practices, while our **in-house QC & Microbiology labs** support quality checks and monitoring at relevant stages of production.

Our support extends to the final stages of commercialization, including **packaging coordination, label support, product coding, and compliance assistance**. This enables brands to streamline the transition from a product idea to a finished soap ready for distribution. Whether you are a startup creating your first skincare range, an established beauty company introducing new active-based products, or a growing brand seeking to increase production capacity, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing services**. Our end-to-end approach helps brands launch and scale customized **Glutathione Soap** products while focusing on their marketing, sales, and business growth.

Ingredients: Glutathione, Kojic Acid, Alpha Arbutin, Niacinamide, Vitamin C, Licorice Extract, Papaya Extract, Turmeric Extract, Vitamin E

8. Skin Brightening Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Radiance Enhancement, Uneven Tone Care, Skin Cleansing**

Product Description:

The Great Herbal's **Skin Brightening Soap** is a specialized cleansing bar developed for brands seeking to create targeted skincare products focused on skin radiance and an even-looking complexion. Designed with carefully selected brightening and skin-conditioning ingredients, the formulation helps cleanse away everyday impurities while supporting a fresh, smooth, and visibly radiant skin appearance. This versatile soap can be positioned as part of daily skincare routines, beauty-focused bathing collections, and specialized personal care ranges.

The formulation can be developed with a customized blend of ingredients such as **Kojic Acid, Glutathione, Niacinamide, Alpha Arbutin, Vitamin C, Licorice Extract, Papaya Extract, Saffron Extract, and Vitamin E** to suit different product concepts and market requirements.

Brands can personalize the formulation, fragrance, color, texture, and packaging to create a distinctive product aligned with their target audience. Whether you are developing a daily radiance soap, an active brightening bar, or a premium complexion-care collection, The Great Herbal offers flexible third-party and private-label soap manufacturing services. **Want to launch your own Skin Brightening Soap? Partner with The Great Herbal to develop a customized product designed around your brand vision.**

Turnkey Manufacturing — Helping Brands Build and Expand Their Soap Portfolio

At **The Great Herbal**, we provide complete manufacturing assistance for brands that want to bring innovative soap products to market or increase the scale of their existing production. Our end-to-end approach combines product development, formulation customization, ingredient selection, manufacturing, quality control, packaging, labeling, and delivery support, giving businesses a streamlined route from an initial concept to a commercially ready product.

Our **GMP & ISO-Certified Facility** provides a controlled manufacturing environment and infrastructure to support the production of customized soap formulations. Our technical team works with brands to develop products based on their preferred ingredients, cleansing characteristics, fragrance, appearance, and intended market positioning. Production processes are managed with a focus on batch consistency, while our **in-house QC & Microbiology labs** support quality evaluation and monitoring throughout the manufacturing cycle.

We understand that successful product launches require more than manufacturing alone. That is why our team also assists with **packaging selection, packaging design support, labeling coordination, product coding, and compliance management** to help simplify the overall launch process. Whether you are a new brand entering the beauty industry, a retailer developing a private-label collection, or an established skincare business expanding into new product categories, The Great Herbal provides scalable **third-party soap manufacturing and turnkey production solutions**. From the first product brief to the final packed goods, we support brands that want to launch and grow their **Skin Brightening Soap** range with a dependable manufacturing partner.

Ingredients: Kojic Acid, Glutathione, Niacinamide, Alpha Arbutin, Vitamin C, Licorice Extract, Papaya Extract, Saffron Extract, Vitamin E

9. Anti-Acne Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Acne-Prone Skin Care, Excess Oil Control, Deep Cleansing**

Product Description:

The Great Herbal's **Anti-Acne Soap** is a targeted cleansing bar developed for brands looking to

introduce specialized personal care solutions for oily and acne-prone skin. The formulation is designed to cleanse away excess sebum, dirt, and daily impurities while helping maintain a cleaner and fresher-looking skin surface. With its targeted skincare positioning, this soap can be developed as part of acne-care routines, oil-control collections, and specialized facial and body cleansing ranges.

Brands can customize the formulation with carefully selected ingredients such as **Salicylic Acid, Tea Tree Oil, Neem Extract, Turmeric Extract, Zinc PCA, Aloe Vera, Green Tea Extract, and Charcoal** to create differentiated cleansing solutions based on specific product concepts. The fragrance, appearance, texture, active blend, and packaging can also be adapted to suit your brand's positioning and target audience. Whether you are launching an acne-care soap, an oil-control cleansing bar, or a specialized skincare range, The Great Herbal offers customized formulation development and private-label soap manufacturing services. **Planning to launch your own Anti-Acne Soap? Partner with The Great Herbal to develop a customized product that aligns with your brand and market requirements.**

Turnkey Manufacturing — Comprehensive Support for Acne-Care Soap Production

At **The Great Herbal**, we provide brands with a complete manufacturing ecosystem for developing and scaling specialized soap products. Our turnkey approach is designed to simplify the production journey by bringing formulation development, ingredient selection, manufacturing, quality assessment, packaging, labeling, and delivery support together under one coordinated service. This enables brands to move efficiently from an initial product idea to a finished soap ready for market distribution.

Our **GMP & ISO-Certified Facility** supports the production of customized soap formulations with a focus on manufacturing consistency and scalable production. For targeted products such as Anti-Acne Soap, our technical team can assist brands in developing formulations around their preferred active ingredients, cleansing profile, fragrance, appearance, and consumer requirements. Our **in-house QC & Microbiology labs** provide quality-focused testing and monitoring to support consistency across production batches and help maintain defined product specifications.

We also support brands throughout the commercialization process with **packaging development, label coordination, product coding, and compliance management**. Our end-to-end manufacturing model is suitable for startups launching specialized skincare products, private-label businesses building their own collections, and established personal care companies expanding their acne and oil-control portfolios. By combining product development expertise with manufacturing and packaging support, The Great Herbal helps businesses launch and scale **Anti-Acne Soap** and other customized skincare products while managing their production requirements through a single manufacturing partner.

Ingredients: Salicylic Acid, Tea Tree Oil, Neem Extract, Turmeric Extract, Zinc PCA, Aloe Vera, Green Tea Extract, Activated Charcoal

10. **Anti-Bacterial Soap Third-Party Manufacturer**

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Hygienic Cleansing, Germ Protection, Fresh Skin Feel**

Product Description:

The Great Herbal's **Anti-Bacterial Soap** is a hygiene-focused cleansing bar developed for brands looking to offer effective everyday cleansing solutions for personal and family care. The formulation is designed to help remove dirt, sweat, and everyday impurities from the skin while providing a fresh and clean bathing experience. With its hygiene-oriented positioning, this soap can be developed for household personal care ranges, daily-use bathing collections, travel hygiene products, and specialized cleansing categories.

The formulation can be customized with selected ingredients such as **Tea Tree Oil, Neem Extract, Tulsi Extract, Eucalyptus Oil, Aloe Vera, Glycerin, Zinc PCA, and Natural Essential Oils** to create distinctive product concepts for different consumer needs. Brands can also personalize the fragrance, color, shape, texture, packaging, and overall formulation to align with their product identity and target market. Whether you are developing an everyday hygiene bar, a botanical cleansing soap, or a family personal care product, The Great Herbal provides flexible formulation development and private-label soap manufacturing solutions. **Looking to launch your own Anti-Bacterial Soap? Partner with The Great Herbal to develop a customized soap product aligned with your brand's requirements.**

Turnkey Manufacturing — Complete Production Support for Hygiene Soap Brands

At **The Great Herbal**, we provide end-to-end manufacturing support for businesses looking to launch, expand, or scale their soap product lines. Our turnkey model is designed to simplify the complete production process by offering coordinated assistance across product development, formulation customization, ingredient selection, manufacturing, quality evaluation, packaging, labeling, and final delivery. By working with one experienced manufacturing partner, brands can streamline their supply chain and focus more effectively on building their market presence.

Our **GMP & ISO-Certified Facility** provides the infrastructure and controlled production environment required to support consistent soap manufacturing at commercial scale. Our technical team works closely with brands to understand their desired product profile, including cleansing characteristics, fragrance, appearance, ingredient preferences, and intended consumer segment. Manufacturing processes are managed with an emphasis on product consistency, while our **in-house QC & Microbiology labs** support quality monitoring and testing throughout relevant stages of production.

Our service extends beyond soap production to include **packaging development support, label coordination, product coding, and compliance management**, helping businesses

efficiently progress from product concept to finished goods. Whether you are a startup introducing a new hygiene range, a private-label retailer expanding its personal care portfolio, or an established brand seeking additional manufacturing capacity, The Great Herbal offers customized **third-party soap manufacturing and turnkey production solutions**. From the initial formulation brief to the final packaged product, we provide the integrated support brands need to launch and scale their **Anti-Bacterial Soap** and other customized hygiene-focused products.

Ingredients: Tea Tree Oil, Neem Extract, Tulsi Extract, Eucalyptus Oil, Aloe Vera, Glycerin, Zinc PCA, Natural Essential Oils

11. Moisturizing Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Intense Moisture, Skin Softness, Gentle Cleansing**

Product Description:

The Great Herbal's **Moisturizing Soap** is a nourishing cleansing bar created for brands seeking to develop personal care products that combine everyday cleansing with a comfortable, moisturized skin feel. Enriched with skin-conditioning ingredients, the formulation is designed to cleanse away daily impurities while helping the skin feel soft, smooth, and refreshed after bathing. Its nourishing profile makes it suitable for daily-use bathing ranges, dry skin care collections, family personal care products, and premium body care portfolios.

The formulation can be customized with ingredients such as **Shea Butter, Glycerin, Cocoa Butter, Coconut Oil, Olive Oil, Almond Oil, Aloe Vera, Vitamin E, and Hyaluronic Acid** to create unique moisturizing soap concepts for different consumer preferences. Brands can also personalize the fragrance, color, shape, texture, ingredient blend, and packaging format to match their desired market positioning. Whether you are launching a nourishing beauty bar, a dry skin cleansing soap, or a premium moisturizing bath range, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Want to create your own Moisturizing Soap? Partner with The Great Herbal to develop a tailored product that reflects your brand's skincare vision.**

Turnkey Manufacturing — Complete Support for Developing and Scaling Soap Products

At **The Great Herbal**, we provide comprehensive end-to-end manufacturing assistance for brands that want to create new soap products or expand their existing personal care collections. Our turnkey approach brings together the essential stages of product development and production, allowing brands to work with a single manufacturing partner throughout the journey. From understanding your product concept and developing the formulation to sourcing suitable

ingredients, manufacturing the soap, conducting quality checks, coordinating packaging, and arranging final delivery, our team supports the complete process.

Our **GMP & ISO-Certified Facility** is equipped to handle customized soap production requirements while supporting consistency and efficiency across commercial batches. Our formulation specialists can help brands develop moisturizing soap concepts based on their preferred emollients, botanical extracts, nourishing oils, fragrance profiles, and desired skin feel. Production is supported by quality-focused processes, while our **in-house QC & Microbiology labs** help with product testing and monitoring at relevant stages to support reliable manufacturing outcomes.

We also provide assistance with **packaging design, packaging selection, label coordination, product coding, and compliance management**, helping brands simplify the path from product development to market launch. Our manufacturing support is suitable for startups, emerging beauty businesses, private-label retailers, established skincare companies, and brands looking to increase their soap production capacity. Whether you are introducing your first moisturizing bar or expanding an established body care portfolio, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help you successfully launch and scale your **Moisturizing Soap** range.

Ingredients: Shea Butter, Glycerin, Cocoa Butter, Coconut Oil, Olive Oil, Almond Oil, Aloe Vera, Vitamin E, Hyaluronic Acid

12. Exfoliating Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Dead Skin Removal, Smoother Skin, Deep Cleansing**

Product Description:

The Great Herbal's **Exfoliating Soap** is a skin-refining cleansing bar developed for brands seeking to offer an enhanced bathing experience with gentle exfoliating benefits. Designed to help cleanse away surface impurities and loosen dead skin cells, the formulation leaves the skin feeling smoother, fresher, and more polished after use. Its exfoliating profile makes it a versatile addition to body care, spa-inspired, beauty cleansing, and premium personal care collections designed for consumers seeking a more refreshing cleansing ritual.

The formulation can be customized with exfoliating and skin-conditioning ingredients such as **Walnut Shell Powder, Oatmeal, Coffee Extract, Papaya Extract, Bamboo Powder, Sugar, Aloe Vera, Shea Butter, and Vitamin E** to create unique product concepts for different market segments. Brands can select the preferred exfoliation level, fragrance profile, color, texture, soap shape, and packaging style to develop a product that complements their brand identity.

Whether you are planning a natural-inspired exfoliating bar, a coffee body soap, a spa-style cleansing product, or a specialized body care range, The Great Herbal offers customized formulation and private-label soap manufacturing solutions. **Looking to launch your own Exfoliating Soap? Connect with The Great Herbal to develop a customized product designed around your brand's requirements.**

Turnkey Manufacturing — Complete Solutions for Customized Soap Production

At **The Great Herbal**, we help brands turn their soap concepts into finished products through an integrated manufacturing process designed to simplify product development and commercial production. Our end-to-end turnkey support covers key stages of the manufacturing journey, including product consultation, formulation development, ingredient selection, sample development, bulk production, quality assessment, packaging coordination, labeling, and final dispatch. This comprehensive approach allows brands to manage their soap manufacturing requirements through one reliable production partner.

Our **GMP & ISO-Certified Facility** is equipped to support customized soap production for brands with different product concepts and commercial requirements. Our formulation team can assist in developing exfoliating soap formulations based on the desired scrub intensity, cleansing performance, ingredient selection, fragrance, appearance, and target consumer profile. Production is carried out with a focus on consistency and scalability, while our **in-house QC & Microbiology labs** support quality testing and monitoring to help maintain defined product specifications throughout the manufacturing process.

We understand that brands need support beyond the manufacturing stage, which is why our services also include **packaging design assistance, packaging coordination, label support, product coding, and compliance management**. Whether you are a new beauty business launching a body care collection, a spa or salon brand developing specialized products, a retailer creating a private-label range, or an established personal care company expanding its portfolio, The Great Herbal offers flexible **third-party soap manufacturing and turnkey production solutions**. From the first product idea to the final packaged soap, we provide end-to-end support to help brands launch and scale their **Exfoliating Soap** and other customized personal care products.

Ingredients: Walnut Shell Powder, Oatmeal, Coffee Extract, Papaya Extract, Bamboo Powder, Sugar, Aloe Vera, Shea Butter, Vitamin E

13. Sandalwood Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Refreshing Cleansing, Skin Soothing, Natural Fragrance**

Product Description:

The Great Herbal's **Sandalwood Soap** is a premium botanical cleansing bar created for brands seeking to develop an ingredient-led bathing product with a warm, aromatic profile. Enriched with **Sandalwood Extract**, the formulation provides a refreshing cleansing experience while helping leave the skin feeling clean, comfortable, and revitalized. Its distinctive botanical character and naturally inspired positioning make it suitable for premium bathing collections, traditional-inspired personal care ranges, spa products, and everyday skincare portfolios.

The formulation can be customized with complementary ingredients such as **Saffron Extract, Rose Extract, Turmeric Extract, Milk Protein, Aloe Vera, Honey, Glycerin, and Vitamin E** to create distinctive soap variants for different consumer segments. Brands can also customize the fragrance intensity, color, shape, texture, ingredient combination, and packaging presentation to complement their market positioning. Whether you are developing a luxury bathing bar, a botanical soap collection, or a traditional-inspired skincare range, The Great Herbal provides flexible formulation development and private-label soap manufacturing support. **Want to launch your own Sandalwood Soap? Connect with The Great Herbal to develop a customized soap product that brings your brand concept to life.**

Turnkey Manufacturing — End-to-End Partnership for Soap Product Launches

At **The Great Herbal**, we provide a complete manufacturing partnership for brands that want to develop, launch, and scale their soap product lines. Our turnkey approach is designed to bring the different stages of soap production together, reducing the complexity of managing separate vendors for formulation, manufacturing, packaging, and product finishing. From understanding the initial product brief and developing the formulation to bulk production, quality checks, packaging, labeling, and final delivery, our team provides coordinated support throughout the entire process.

Our **GMP & ISO-Certified Facility** is equipped to support the production of customized soap formulations with a focus on consistent manufacturing and efficient commercial production. Our formulation experts work with brands to develop products according to their desired ingredient profile, fragrance character, cleansing properties, appearance, and target market. Production is supported by quality-focused processes, while our **in-house QC & Microbiology labs** assist with relevant testing and monitoring to support product quality and batch consistency.

To help brands move smoothly toward commercialization, we also provide **packaging development support, packaging coordination, labeling assistance, product coding, and compliance management**. Our end-to-end manufacturing model is suitable for startups developing their first personal care range, established beauty companies introducing new soap variants, private-label retailers, and businesses looking to expand their manufacturing capabilities. Whether your goal is to create a premium Sandalwood Soap or build an entire botanical bathing collection, The Great Herbal provides comprehensive **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to support your brand from product concept to final delivery.

Ingredients: Sandalwood Extract, Saffron Extract, Rose Extract, Turmeric Extract, Milk Protein, Aloe Vera, Honey, Glycerin, Vitamin E

14. Papaya Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Skin Radiance, Gentle Exfoliation, Refreshing Cleansing**

Product Description:

The Great Herbal's **Papaya Soap** is a fruit-enriched cleansing bar developed for brands looking to introduce refreshing and radiance-focused skincare products into their personal care portfolio. Formulated with **Papaya Extract**, the soap is designed to cleanse the skin while supporting a smoother, fresher, and more radiant-looking appearance. Its fruit-inspired positioning makes it a versatile addition to beauty soap collections, daily bathing ranges, and skincare products designed around gentle exfoliation and skin renewal.

The formulation can be customized with complementary ingredients such as **Papaya Enzyme, Vitamin C, Aloe Vera, Honey, Carrot Extract, Licorice Extract, Glycerin, Shea Butter, and Vitamin E** to create distinctive product concepts for different target markets. Brands can also customize the soap's fragrance, color, texture, shape, and packaging to complement their unique product identity. Whether you are developing a fruit-based beauty bar, a radiance-focused cleansing soap, or a premium skincare collection, The Great Herbal offers flexible formulation development and private-label soap manufacturing solutions. **Looking to launch your own Papaya Soap? Partner with The Great Herbal to develop a customized product that matches your brand vision and market requirements.**

Turnkey Manufacturing — End-to-End Soap Production for New and Growing Brands

At **The Great Herbal**, we help businesses bring their soap concepts to life through comprehensive turnkey manufacturing support. Our end-to-end model is designed for brands that want to launch new soap products or increase the scale of their existing production while working with a single manufacturing partner. We provide coordinated support across product planning, formulation development, ingredient selection, sample preparation, commercial manufacturing, quality evaluation, packaging, labeling, and final product delivery.

Our **GMP & ISO-Certified Facility** provides the manufacturing infrastructure needed to support customized soap production for different product concepts and market segments. Our formulation specialists work closely with brands to develop products according to their preferred active ingredients, botanical extracts, cleansing properties, fragrance, color, appearance, and desired skin feel. Production is managed with a focus on consistency and scalability, while our **in-house QC & Microbiology labs** support quality testing and monitoring throughout the relevant stages of manufacturing.

We also assist brands with important commercialization requirements, including **packaging development support, packaging coordination, label assistance, product coding, and compliance management**. Our integrated approach is suitable for startups launching their first beauty products, private-label businesses creating customized soap collections, retailers expanding their personal care offerings, and established brands seeking to scale production. From formulation and manufacturing to packaging and final dispatch, The Great Herbal provides reliable **third-party soap manufacturing, private-label soap production, and turnkey manufacturing solutions** to help brands successfully launch and grow their **Papaya Soap** and broader personal care portfolios.

Ingredients: Papaya Extract, Papaya Enzyme, Vitamin C, Aloe Vera, Honey, Carrot Extract, Licorice Extract, Glycerin, Shea Butter, Vitamin E

15. Goat Milk Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Moisture-Rich Cleansing, Skin Softness, Nourishing Care**

Product Description:

The Great Herbal's **Goat Milk Soap** is a creamy, nourishing cleansing bar developed for brands looking to introduce premium milk-based skincare products into their personal care portfolio. Enriched with **Goat Milk**, the formulation is designed to gently cleanse the skin while providing a comfortable, soft, and conditioned after-feel. Its rich and luxurious profile makes it an appealing choice for moisturizing bath collections, sensitive-skin-focused personal care ranges, premium beauty soaps, and everyday cleansing products.

The formulation can be customized with complementary ingredients such as **Shea Butter, Cocoa Butter, Colloidal Oatmeal, Honey, Aloe Vera, Almond Oil, Coconut Oil, Glycerin, and Vitamin E** to create distinctive soap variants for different skin care preferences. Brands can also customize the fragrance, color, texture, shape, milk concentration, and packaging presentation according to their product concept and target audience. Whether you are developing a creamy moisturizing bar, a nourishing milk soap, or an upscale bath and body collection, The Great Herbal provides customized formulation and private-label soap manufacturing solutions. **Want to launch your own Goat Milk Soap? Partner with The Great Herbal to develop a premium soap product tailored to your brand requirements.**

Turnkey Manufacturing — Complete Goat Milk Soap Solutions from Concept to Delivery
At **The Great Herbal**, we provide comprehensive end-to-end manufacturing support for brands seeking to develop and scale premium soap products. Our turnkey approach is designed to simplify the entire manufacturing journey by bringing product consultation, formulation development, ingredient selection, sampling, production, quality assurance, packaging, labeling,

and final delivery together under one coordinated service. This allows brands to focus on building their product identity while our team manages the key stages involved in bringing their soap concept to market.

Our **GMP & ISO-Certified Facility** supports customized soap production with infrastructure designed to handle different formulation requirements and commercial production volumes. For milk-based products such as Goat Milk Soap, our formulation team can work with brands to develop the desired cleansing, moisturizing, fragrance, appearance, and skin-feel characteristics. Ingredient selection and formulation parameters can be adjusted according to the intended market positioning, while our **in-house QC & Microbiology labs** support quality testing and monitoring during the manufacturing process.

Our support continues through the final stages of product commercialization with assistance for **packaging design, packaging selection, label coordination, product coding, and compliance management**. We work with startups, beauty entrepreneurs, private-label retailers, established skincare companies, and growing personal care brands looking to launch or expand their soap portfolios. Whether you are introducing a single Goat Milk Soap or developing a complete range of premium bathing products, The Great Herbal offers reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help your brand move efficiently from product concept to finished goods and scale its soap manufacturing production.

Ingredients: Goat Milk, Shea Butter, Cocoa Butter, Colloidal Oatmeal, Honey, Aloe Vera, Almond Oil, Coconut Oil, Glycerin, Vitamin E

16. Shea Butter Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Rich Moisturization, Skin Softness, Nourishing Cleansing**

Product Description:

The Great Herbal's **Shea Butter Soap** is a rich and nourishing cleansing bar developed for brands seeking to offer a luxurious bathing experience with moisturizing skin care benefits. Formulated with **Shea Butter**, the soap is designed to cleanse the skin while helping maintain a soft, smooth, and conditioned feel. Its creamy and nourishing profile makes it an excellent choice for premium bath and body collections, dry skin care ranges, moisturizing beauty bars, and everyday personal care products focused on skin comfort.

The formulation can be customized with complementary ingredients such as **Mango Butter, Cocoa Butter, Coconut Oil, Olive Oil, Sweet Almond Oil, Oat Extract, Honey, Aloe Vera, and Vitamin E** to create differentiated soap products for various consumer preferences. Brands

can also personalize the fragrance, color, texture, shape, formulation, and packaging presentation to match their desired market positioning. Whether you are developing a luxurious moisturizing bar, a nourishing body soap, or a premium skincare collection, The Great Herbal offers flexible formulation development and private-label soap manufacturing solutions. **Looking to launch your own Shea Butter Soap? Partner with The Great Herbal to develop a customized product that complements your brand and meets your target market requirements.**

Turnkey Manufacturing — Complete Soap Manufacturing Support for Brand Growth

At **The Great Herbal**, we provide comprehensive end-to-end manufacturing assistance for brands that want to introduce new soap products or expand their existing personal care production. Our turnkey manufacturing model is designed to simplify the entire process by connecting product development, formulation customization, raw material selection, manufacturing, quality assessment, packaging, labeling, and final delivery through one coordinated manufacturing partner. This approach helps brands reduce the complexity of managing multiple production stages while maintaining greater flexibility over their product specifications.

Our **GMP & ISO-Certified Facility** is equipped to support the production of customized soap formulations for different market segments and commercial requirements. Our formulation specialists collaborate with brands to develop products according to their desired moisturizing properties, cleansing experience, ingredient combinations, fragrance profile, appearance, and target consumer needs. Our production processes focus on maintaining consistency across batches, while our **in-house QC & Microbiology labs** support quality evaluation and monitoring throughout the manufacturing lifecycle.

We also assist brands with the important steps required to prepare products for market, including **packaging development support, packaging coordination, label assistance, product coding, and compliance management**. Our services are suitable for startups launching their first beauty products, private-label retailers building customized soap collections, established skincare brands adding new product variants, and businesses looking to increase their manufacturing capacity. From initial product planning and formulation to commercial production and final dispatch, The Great Herbal offers reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands launch and scale their **Shea Butter Soap** and broader bath and body product portfolios.

Ingredients: Shea Butter, Mango Butter, Cocoa Butter, Coconut Oil, Olive Oil, Sweet Almond Oil, Oat Extract, Honey, Aloe Vera, Vitamin E

17. Luxury Bath Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available

- Turnkey Solutions: Available
- Benefits: **Premium Cleansing, Skin Indulgence, Luxurious Bathing Experience**

Product Description:

The Great Herbal's **Luxury Bath Soap** is a premium cleansing bar crafted for brands seeking to create an elevated bathing experience with sophisticated formulations and distinctive product presentation. Designed with carefully selected cleansing and skin-conditioning ingredients, the soap can deliver a rich, refined, and indulgent bathing experience while leaving the skin feeling clean, smooth, and refreshed. Its premium positioning makes it suitable for luxury beauty brands, boutique personal care collections, hotel amenities, spa ranges, gifting products, and high-end bath and body portfolios.

The formulation can be customized with premium ingredients such as **Shea Butter, Cocoa Butter, Argan Oil, Jojoba Oil, Rose Extract, Saffron Extract, Silk Protein, Vitamin E, and Natural Essential Oils** to create a distinctive product tailored to your brand concept. Brands can also customize the fragrance profile, soap shape, color, finish, texture, ingredient combination, and packaging design to create a sophisticated product experience from the soap bar to the final presentation. Whether you are developing a luxury beauty bar, a premium hotel soap, an exclusive spa collection, or a high-end bath and body range, The Great Herbal provides customized formulation and private-label soap manufacturing solutions. **Want to launch your own Luxury Bath Soap? Partner with The Great Herbal to develop a premium product that reflects your brand's identity and market positioning.**

Turnkey Manufacturing — End-to-End Solutions for Premium Soap Brands

At **The Great Herbal**, we provide comprehensive turnkey manufacturing support for brands that want to create premium soap products and build a differentiated bath and body portfolio. Our end-to-end approach brings together the essential stages of product development and production, helping brands manage their entire journey through one experienced manufacturing partner. From understanding the product vision and developing the formulation to ingredient selection, sampling, commercial manufacturing, quality control, packaging, labeling, and final delivery, we provide coordinated support throughout the process.

Our **GMP & ISO-Certified Facility** supports the manufacturing of customized soap products with infrastructure designed to meet diverse product requirements and commercial production needs. Our technical and formulation teams work closely with brands to develop products around their desired cleansing performance, skin-conditioning properties, fragrance character, visual appeal, texture, and target market. Premium soap concepts can be tailored with selected ingredients and customized finishing options to create a product that aligns with the brand's positioning. Our **in-house QC & Microbiology labs** support quality evaluation and monitoring to help maintain consistency across production batches.

We also support the product commercialization process with **packaging development assistance, premium packaging coordination, label support, product coding, and compliance management**. Our integrated manufacturing model is suitable for luxury beauty startups, established skincare companies, spa and wellness brands, hospitality businesses,

private-label retailers, and businesses looking to expand their premium soap portfolio. Whether you are launching a signature luxury soap or developing a complete collection of high-end bath products, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands launch and scale their soap production from concept to final delivery.

Ingredients: Shea Butter, Cocoa Butter, Argan Oil, Jojoba Oil, Rose Extract, Saffron Extract, Silk Protein, Vitamin E, Natural Essential Oils

18. Medicated Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Targeted Cleansing, Skin Hygiene, Specialized Care**

Product Description:

The Great Herbal's **Medicated Soap** is a specialized cleansing bar developed for brands looking to introduce targeted skin and hygiene solutions into their personal care portfolio. Designed with carefully selected functional ingredients, the formulation can be developed to support specific cleansing and skincare requirements while providing a fresh and effective bathing experience. Depending on the intended product positioning and applicable regulatory requirements, the soap can be customized for categories such as acne-prone skin care, antifungal cleansing, antibacterial hygiene, excess oil management, or other specialized personal care needs.

Brands can develop customized formulations with ingredients such as **Salicylic Acid, Zinc Pyrithione, Sulfur, Tea Tree Oil, Neem Extract, Ketoconazole, Chlorhexidine, or other suitable actives**, subject to formulation feasibility and applicable regulatory requirements. The soap can also be customized according to fragrance, color, cleansing profile, texture, shape, packaging, and target market. Whether you are developing a specialized cleansing bar, dermatology-focused soap, hygiene product, or targeted skin care range, The Great Herbal offers formulation development and private-label manufacturing support. **Looking to launch your own Medicated Soap? Partner with The Great Herbal to develop a product aligned with your brand concept and applicable regulatory requirements.**

Turnkey Manufacturing — End-to-End Support for Specialized Soap Product Development

At **The Great Herbal**, we provide comprehensive end-to-end manufacturing support for brands seeking to develop and scale specialized soap products. Our turnkey approach is designed to simplify the complete product journey by bringing formulation development, ingredient evaluation, manufacturing, quality processes, packaging, labeling, compliance assistance, and final delivery together through one coordinated manufacturing partner. This enables brands to

move from an initial product concept toward commercial production with structured support at every important stage.

Our **GMP & ISO-Certified Facility** provides the manufacturing infrastructure required to support customized soap production for different product concepts and commercial requirements. Our technical team works with brands to understand their intended product category, target consumers, preferred ingredients, cleansing properties, fragrance, appearance, and market positioning. For specialized formulations, ingredient selection and product development are approached with consideration for formulation compatibility, product specifications, and applicable regulatory requirements. Our **in-house QC & Microbiology labs** support quality evaluation and monitoring throughout relevant stages of production to help maintain product consistency.

We also assist brands with the wider product launch process through **packaging development support, label coordination, product coding, and compliance management**. Our end-to-end model is suitable for skincare startups, dermatology-focused brands, private-label businesses, retailers, and established personal care companies seeking to introduce specialized cleansing products or expand their existing soap portfolio. Whether you are launching a targeted skin cleansing bar or developing a broader range of specialized personal care soaps, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to support your brand from product development through final delivery.

Ingredients: Salicylic Acid, Zinc Pyrithione, Sulfur, Tea Tree Oil, Neem Extract, Ketoconazole, Chlorhexidine, Functional Skin-Care Actives

19. **Coco-Ghee Soap Third-Party Manufacturer**

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Nourishing Cleansing, Skin Softness, Moisture Care**

Product Description:

The Great Herbal's **Coco-Ghee Soap** is a nourishing cleansing bar developed for brands looking to introduce a rich, oil-based bathing product with a unique combination of **Coconut Oil and Ghee**. The formulation is designed to cleanse the skin while providing a comfortable and conditioned after-feel, making it suitable for consumers who prefer moisturizing and nourishment-focused bathing products. Its distinctive ingredient combination offers brands an opportunity to create a differentiated soap product for premium bath and body, traditional-inspired personal care, and everyday skincare collections.

The formulation can be customized with complementary ingredients such as **Shea Butter, Cocoa Butter, Aloe Vera, Milk Protein, Honey, Almond Oil, Olive Oil, Vitamin E, and Natural Essential Oils** to develop unique variants for different target audiences. Brands can also customize the fragrance, color, texture, soap shape, cleansing profile, and packaging presentation according to their product concept. Whether you are planning a nourishing body soap, a traditional-inspired beauty bar, or a premium moisturizing cleansing range, The Great Herbal offers flexible formulation development and private-label soap manufacturing solutions. **Want to launch your own Coco-Ghee Soap? Partner with The Great Herbal to transform your product concept into a customized, market-ready soap range.**

Turnkey Manufacturing — Complete Support for Launching and Scaling Your Soap Production

At **The Great Herbal**, we provide brands with comprehensive support throughout the soap manufacturing journey, helping businesses move efficiently from an initial product idea to commercial production and final delivery. Our turnkey manufacturing model is designed for brands that want to launch new soap products or scale their existing production with the support of a single, experienced manufacturing partner. We coordinate essential stages including product consultation, formulation development, ingredient selection, sampling, bulk manufacturing, quality assessment, packaging, labeling, and finished-product dispatch.

Our **GMP & ISO-Certified Facility** supports the production of customized soap formulations with infrastructure designed to accommodate different product concepts and commercial requirements. Our formulation specialists work closely with brands to develop soap products based on their preferred oils, butters, nourishing ingredients, cleansing properties, fragrance profiles, appearance, and target consumer preferences. The formulation can be adjusted to achieve the desired skin feel and product positioning, while our **in-house QC & Microbiology labs** support quality testing and monitoring throughout the relevant production stages.

Beyond manufacturing, our team assists brands with the practical requirements involved in bringing products to market, including **packaging design support, packaging coordination, label assistance, product coding, and compliance management**. Our integrated approach is suitable for startups launching their first personal care products, private-label retailers creating distinctive soap collections, established beauty brands expanding their portfolios, and businesses seeking to increase their production capacity. From developing the Coco-Ghee Soap formulation to manufacturing, packaging, and final delivery, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey solutions** to help brands successfully launch and scale their soap product lines.

Ingredients: Coconut Oil, Ghee, Shea Butter, Cocoa Butter, Aloe Vera, Milk Protein, Honey, Almond Oil, Olive Oil, Vitamin E, Natural Essential Oils

20. Cow-Ghee Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options

- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Nourishing Cleansing, Skin Conditioning, Rich Moisture Care**

Product Description:

The Great Herbal's **Cow-Ghee Soap** is a nourishing bathing bar created for brands looking to introduce a traditional ingredient-inspired personal care product with a rich and comforting cleansing experience. Formulated with **Cow Ghee**, the soap is designed to cleanse the skin while helping provide a soft, smooth, and conditioned after-feel. Its distinctive ingredient profile makes it suitable for brands developing traditional-inspired beauty products, premium bathing collections, moisturizing soap ranges, and specialized personal care portfolios.

The formulation can be customized with complementary ingredients such as **Sandalwood Extract, Turmeric Extract, Saffron Extract, Milk Protein, Aloe Vera, Honey, Coconut Oil, Almond Oil, Shea Butter, and Vitamin E** to create unique product concepts for different target markets. Brands can also personalize the fragrance, color, texture, soap shape, ingredient blend, and packaging presentation according to their product vision. Whether you are developing a traditional beauty bar, a nourishing bathing soap, or a premium ingredient-focused cleansing range, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Planning to launch your own Cow-Ghee Soap? Partner with The Great Herbal to develop a distinctive soap product tailored to your brand requirements.**

Turnkey Manufacturing — Integrated Solutions for Your Complete Soap Production Journey

At **The Great Herbal**, we provide comprehensive end-to-end manufacturing support for brands that want to launch new soap products or expand their existing manufacturing capabilities. Our turnkey approach is designed to bring the entire product development and production journey together, allowing brands to work with one coordinated manufacturing partner. From understanding your product concept and selecting suitable ingredients to formulation development, sampling, commercial manufacturing, quality evaluation, packaging, labeling, and final delivery, we support the complete process.

Our **GMP & ISO-Certified Facility** is equipped to handle customized soap production for diverse personal care requirements. Our formulation team works with brands to develop product specifications based on the desired cleansing properties, nourishing ingredients, fragrance, appearance, texture, and target consumer profile. For traditional ingredient-led products such as Cow-Ghee Soap, the formulation can be tailored to create a distinctive sensory experience and product identity. Our **in-house QC & Microbiology labs** support quality evaluation and process monitoring to help maintain consistency across production batches.

Our end-to-end support also covers essential commercialization requirements, including **packaging design assistance, packaging selection, label coordination, product coding, and compliance management**. Whether you are a startup entering the personal care industry,

a private-label business developing a specialized soap range, a retailer expanding its product portfolio, or an established beauty brand looking to scale production, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions**. From the initial formulation concept to the final packed product, we help brands efficiently develop, launch, and scale their **Cow-Ghee Soap** and other customized soap products.

Ingredients: Cow Ghee, Sandalwood Extract, Turmeric Extract, Saffron Extract, Milk Protein, Aloe Vera, Honey, Coconut Oil, Almond Oil, Shea Butter, Vitamin E

21. Rose & Almond Cream Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Creamy Cleansing, Skin Nourishment, Floral Freshness**

Product Description:

The Great Herbal's **Rose & Almond Cream Soap** is a rich and indulgent cleansing bar developed for brands seeking to combine the nourishing properties of **Almond Oil** with the delicate floral character of **Rose Extract**. The creamy formulation is designed to cleanse the skin while helping leave it feeling soft, smooth, and comfortably moisturized. Its elegant fragrance and nourishing profile make it an appealing choice for premium beauty soaps, feminine personal care collections, luxury bathing ranges, and everyday skincare products.

The formulation can be customized with complementary ingredients such as **Shea Butter, Cocoa Butter, Rose Water, Sweet Almond Oil, Milk Protein, Glycerin, Honey, Vitamin E, and Aloe Vera** to create a distinctive cream soap tailored to your target market. Brands can also personalize the fragrance intensity, color, creaminess, soap shape, texture, ingredient blend, and packaging design to establish a unique product identity. Whether you are developing a luxurious floral soap, a nourishing cream bar, or an elegant bath and body collection, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Want to launch your own Rose & Almond Cream Soap? Partner with The Great Herbal to transform your concept into a customized, market-ready product.**

Turnkey Manufacturing — Complete End-to-End Support for Your Soap Brand

At **The Great Herbal**, we provide comprehensive turnkey manufacturing solutions for brands looking to develop, launch, and scale their soap product portfolios. Our end-to-end approach is designed to simplify the entire manufacturing journey by bringing product development, formulation, ingredient sourcing, sampling, production, quality evaluation, packaging, labeling, and final delivery together through one coordinated partner. This allows brands to focus on their market strategy and brand building while our team manages the key production requirements.

Our **GMP & ISO-Certified Facility** supports the manufacturing of customized soap formulations with infrastructure designed to accommodate different product concepts and commercial production needs. Our formulation specialists collaborate with brands to develop products based on their desired cleansing properties, moisturizing performance, creaminess, fragrance profile, botanical ingredients, appearance, and target consumer preferences. We can help create differentiated soap formulations that align with specific brand positioning, while our **in-house QC & Microbiology labs** support quality assessment and monitoring during relevant stages of production.

Our support extends beyond manufacturing to help brands prepare their products for market through **packaging design assistance, packaging selection, label coordination, product coding, and compliance management**. Whether you are a startup launching a premium bath and body collection, a private-label retailer creating a signature soap range, a hotel or spa developing customized amenities, or an established beauty company expanding its personal care portfolio, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions**. From the first product concept to the final packed soap, we provide end-to-end support to help brands successfully launch and scale their **Rose & Almond Cream Soap** and other customized personal care products.

Ingredients: Rose Extract, Almond Oil, Shea Butter, Cocoa Butter, Rose Water, Sweet Almond Oil, Milk Protein, Glycerin, Honey, Vitamin E, Aloe Vera

22. Walnut Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Gentle Exfoliation, Deep Cleansing, Smoother Skin**

Product Description:

The Great Herbal's **Walnut Soap** is an exfoliating cleansing bar developed for brands seeking to offer a refreshing and skin-polishing bathing experience. Formulated with **Walnut Shell Powder**, the soap is designed to help cleanse away surface impurities and support the removal of dead skin cells, leaving the skin feeling smoother and refreshed. Its exfoliating character makes it a suitable addition to body care collections, natural-inspired beauty ranges, spa products, and personal care portfolios focused on enhanced cleansing.

The formulation can be customized with complementary ingredients such as **Oatmeal, Coffee Extract, Papaya Extract, Aloe Vera, Shea Butter, Honey, Glycerin, Vitamin E, and Coconut Oil** to develop unique variants for different consumer preferences. Brands can also adjust the exfoliation intensity, fragrance, color, texture, soap shape, and packaging presentation according to their product concept and target market. Whether you are developing a botanical

exfoliating bar, a body polishing soap, or a refreshing scrub-inspired cleansing product, The Great Herbal provides customized formulation development and private-label soap manufacturing solutions. **Looking to launch your own Walnut Soap? Partner with The Great Herbal to develop a distinctive product tailored to your brand and market requirements.**

Turnkey Manufacturing — Complete Soap Production Support from Concept to Finished Product

At **The Great Herbal**, we provide brands with comprehensive end-to-end support for developing and scaling their soap manufacturing operations. Our turnkey manufacturing model is designed to simplify the complete journey from an initial product idea to a finished, packaged soap ready for distribution. We coordinate key stages including product consultation, formulation development, ingredient selection, sampling, manufacturing, quality evaluation, packaging, labeling, and final product dispatch, giving brands a streamlined route to market.

Our **GMP & ISO-Certified Facility** provides the infrastructure required to support customized soap manufacturing for a wide range of product concepts. Our formulation team can work with brands to develop Walnut Soap based on their preferred exfoliation level, cleansing properties, ingredient combinations, fragrance, appearance, and desired consumer experience. The formulation can be adapted for different market segments, while our **in-house QC & Microbiology labs** support product testing and quality monitoring throughout relevant stages of production.

We also provide assistance with the important requirements involved in preparing products for commercial launch, including **packaging design support, packaging selection, label coordination, product coding, and compliance management**. Our integrated manufacturing services are suitable for startups, beauty entrepreneurs, private-label retailers, spa and wellness brands, and established personal care companies looking to introduce new soap variants or increase production capacity. Whether you are launching a single exfoliating soap or building an extensive body care collection, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands successfully launch and scale their **Walnut Soap** and other customized personal care products.

Ingredients: Walnut Shell Powder, Oatmeal, Coffee Extract, Papaya Extract, Aloe Vera, Shea Butter, Honey, Glycerin, Vitamin E, Coconut Oil

23. Apricot Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Gentle Exfoliation, Skin Smoothing, Refreshing Cleansing**

Product Description:

The Great Herbal's **Apricot Soap** is a fruit-inspired cleansing bar developed for brands seeking to introduce a refreshing and skin-smoothing product into their bath and body portfolio. Enriched with **Apricot Extract**, the formulation is designed to cleanse away everyday dirt and impurities while supporting a soft, fresh, and smooth-looking skin feel. Its naturally inspired fruit profile makes it a versatile choice for beauty soap collections, exfoliating body care ranges, and personal care products designed around a refreshing bathing experience.

The formulation can be customized with complementary ingredients such as **Apricot Kernel Powder, Oat Extract, Papaya Extract, Aloe Vera, Honey, Jojoba Oil, Shea Butter, Glycerin, and Vitamin E** to develop differentiated soap variants for various consumer preferences. Brands can also personalize the exfoliation level, fragrance, color, texture, soap shape, and packaging presentation to create a product that aligns with their brand identity. Whether you are developing a fruit-based beauty bar, an exfoliating body soap, or a premium botanical-inspired cleansing range, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Looking to launch your own Apricot Soap? Partner with The Great Herbal to develop a customized product designed around your brand's unique requirements.**

Turnkey Manufacturing — Complete Support for Launching and Scaling Soap Production

At **The Great Herbal**, we help brands manage the complete soap manufacturing journey with integrated turnkey solutions designed to support product development, commercial production, and business growth. Our end-to-end service brings together formulation planning, ingredient selection, product sampling, manufacturing, quality evaluation, packaging coordination, labeling, and final delivery. By providing these services through one manufacturing partner, we help businesses simplify their production process and move efficiently from a product idea to a market-ready soap.

Our **GMP & ISO-Certified Facility** is equipped to support customized soap production for emerging and established brands across different personal care categories. Our formulation experts work closely with brands to develop products based on their preferred ingredients, cleansing performance, exfoliation requirements, fragrance profile, appearance, and target consumer segment. For products such as Apricot Soap, the formulation can be tailored to achieve the desired balance between cleansing and exfoliating characteristics. Our **in-house QC & Microbiology labs** support quality testing and monitoring at relevant stages to help maintain product consistency across manufacturing batches.

Our support continues beyond production with assistance in **packaging design, packaging selection, label coordination, product coding, and compliance management**. Whether you are a startup preparing to launch a new beauty range, a private-label retailer building a customized soap collection, or an established personal care company looking to increase production capacity, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions**. From the initial formulation concept to the final packed product, we provide end-to-end support to help brands launch and scale their **Apricot Soap** and broader bath and body portfolios.

Ingredients: Apricot Extract, Apricot Kernel Powder, Oat Extract, Papaya Extract, Aloe Vera, Honey, Jojoba Oil, Shea Butter, Glycerin, Vitamin E

24. Coffee Scrub Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Other Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Exfoliating Cleansing, Skin Smoothing, Invigorating Bathing**

Product Description:

The Great Herbal's **Coffee Scrub Soap** is an energizing exfoliating cleansing bar developed for brands looking to bring the appeal of coffee-inspired skincare into their bath and body portfolio. Formulated with **Coffee Powder and Coffee Extract**, the soap is designed to cleanse the skin while helping remove surface impurities and dead skin cells, leaving it feeling refreshed, polished, and smooth. Its rich coffee profile and invigorating positioning make it an attractive choice for body care brands, spa-inspired collections, men's grooming ranges, and premium exfoliating soap products.

The formulation can be customized with complementary ingredients such as **Coconut Shell Powder, Walnut Shell Powder, Cocoa Butter, Shea Butter, Caffeine, Aloe Vera, Glycerin, Vitamin E, and Sweet Almond Oil** to develop differentiated scrub soap formulations for various market segments. Brands can customize the exfoliation level, coffee fragrance, color, texture, soap shape, ingredient blend, and packaging presentation according to their product concept. Whether you are developing a coffee body scrub bar, an exfoliating bath soap, a spa-inspired cleansing product, or a specialized men's grooming soap, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Want to launch your own Coffee Scrub Soap? Partner with The Great Herbal to transform your product concept into a customized, market-ready soap range.**

Turnkey Manufacturing — End-to-End Solutions for Coffee Scrub Soap Production

At **The Great Herbal**, we provide complete turnkey manufacturing support for brands that want to launch distinctive soap products or scale their existing bath and body production. Our end-to-end approach is designed to manage the complete journey from product concept and formulation development to ingredient selection, sampling, commercial manufacturing, quality evaluation, packaging, labeling, and final product delivery. By bringing these essential services together, we help brands streamline their production operations and bring new soap concepts to market more efficiently.

Our **GMP & ISO-Certified Facility** supports customized soap production with manufacturing infrastructure designed for consistent and scalable output. Our formulation specialists work closely with brands to create Coffee Scrub Soap products based on their preferred exfoliation level, cleansing properties, coffee content, fragrance profile, appearance, and desired skin feel.

We can help develop formulations for different consumer segments and product categories, while our **in-house QC & Microbiology labs** support quality assessment and monitoring throughout relevant stages of production.

Our manufacturing support also extends to the final steps required to prepare your product for commercial launch, including **packaging development assistance, packaging coordination, label support, product coding, and compliance management**. Whether you are a startup creating a coffee-inspired body care range, a men's grooming brand expanding into exfoliating products, a spa developing its own retail collection, or an established beauty company looking to increase production capacity, The Great Herbal offers flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions**. From the initial product brief to the final packaged soap, we provide end-to-end support to help brands launch and scale their **Coffee Scrub Soap** and broader personal care portfolios.

Ingredients: Coffee Powder, Coffee Extract, Coconut Shell Powder, Walnut Shell Powder, Cocoa Butter, Shea Butter, Caffeine, Aloe Vera, Glycerin, Vitamin E, Sweet Almond Oil

25. Oats & Honey Exfoliating Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Gentle Exfoliation, Skin Softness, Nourishing Cleansing**

Product Description:

The Great Herbal's **Oats & Honey Exfoliating Soap** is a nourishing cleansing bar developed for brands looking to combine gentle exfoliation with a comforting and skin-conditioning bathing experience. Enriched with **Oatmeal and Honey**, the formulation is designed to cleanse the skin while helping remove surface impurities and leaving it feeling soft, smooth, and refreshed. Its mild exfoliating profile and naturally inspired ingredient combination make it suitable for body care collections, sensitive-skin-focused cleansing ranges, premium bathing products, and everyday personal care portfolios.

The formulation can be customized with complementary ingredients such as **Colloidal Oatmeal, Almond Oil, Shea Butter, Milk Protein, Aloe Vera, Glycerin, Beeswax, Jojoba Oil, and Vitamin E** to develop unique soap variants for different consumer preferences. Brands can also tailor the exfoliating texture, fragrance, color, soap shape, ingredient blend, and packaging style to create a distinctive product aligned with their market positioning. Whether you are developing a gentle exfoliating bar, a honey-based beauty soap, or a nourishing body care collection, The Great Herbal provides customized formulation development and private-label soap manufacturing solutions. **Looking to launch your own Oats & Honey Exfoliating Soap? Partner with The Great Herbal to develop a customized product that brings your brand's concept to life.**

Turnkey Manufacturing — Complete Support for Developing and Scaling Your Soap Range

At **The Great Herbal**, we offer an integrated turnkey manufacturing service for brands that want to develop new soap products or expand their existing bath and body portfolio. Our end-to-end support is designed to simplify the complete production journey, covering product consultation, formulation development, ingredient selection, sampling, manufacturing, quality evaluation, packaging coordination, labeling, and final product delivery. By managing these stages through one experienced manufacturing partner, we help brands reduce production complexity and move efficiently from concept to finished goods.

Our **GMP & ISO-Certified Facility** provides the infrastructure needed to support customized soap manufacturing for a wide range of product concepts and commercial requirements. Our formulation experts collaborate with brands to develop products according to their preferred exfoliation level, cleansing properties, moisturizing ingredients, fragrance, appearance, and target consumer profile. For exfoliating soaps, we can help establish the desired texture and exfoliation experience while maintaining the overall product concept. Our **in-house QC & Microbiology labs** support quality testing and monitoring throughout relevant manufacturing stages to help maintain consistency across production batches.

We also assist with the important requirements involved in preparing products for market, including **packaging design support, packaging selection, label coordination, product coding, and compliance management**. Our end-to-end services are suitable for startups launching their first skincare range, private-label retailers creating customized soap collections, established beauty brands expanding their product portfolio, and businesses seeking to scale their soap manufacturing production. From formulation development and bulk manufacturing to packaging and final delivery, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey solutions** to help brands successfully launch and grow their **Oats & Honey Exfoliating Soap** and other customized personal care products.

Ingredients: Oatmeal, Honey, Colloidal Oatmeal, Almond Oil, Shea Butter, Milk Protein, Aloe Vera, Glycerin, Beeswax, Jojoba Oil, Vitamin E

26. Chamomile Relaxation Bar Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Gentle Cleansing, Soothing Bathing, Relaxing Fragrance**

Product Description:

The Great Herbal's **Chamomile Relaxation Bar** is a calming and aromatic cleansing bar developed for brands looking to create a soothing bath and body experience. Enriched with

Chamomile Extract, the formulation is designed to gently cleanse the skin while offering a comforting and refreshing bathing ritual. Its soft botanical profile and relaxing fragrance concept make it suitable for wellness-focused personal care collections, spa-inspired ranges, premium bath products, and brands looking to introduce a more tranquil approach to everyday cleansing.

The formulation can be customized with complementary ingredients such as **Lavender Extract, Oatmeal, Aloe Vera, Rose Water, Shea Butter, Calendula Extract, Jojoba Oil, Honey, and Vitamin E** to create distinctive relaxation-focused soap variants. Brands can personalize the fragrance profile, botanical blend, color, texture, shape, cleansing properties, and packaging presentation according to their target market and brand identity. Whether you are developing a spa-inspired cleansing bar, a calming bath product, a botanical wellness range, or a premium relaxation collection, The Great Herbal provides customized formulation development and private-label soap manufacturing solutions. **Want to launch your own Chamomile Relaxation Bar? Partner with The Great Herbal to develop a unique product tailored to your brand vision.**

Turnkey Manufacturing — From Product Idea to Finished Relaxation Bar

At **The Great Herbal**, we provide complete turnkey manufacturing support for brands seeking to develop distinctive bath and body products and bring them to market efficiently. Our end-to-end manufacturing model covers the complete production journey, starting with product consultation and formulation planning and extending through ingredient selection, sample development, bulk manufacturing, quality evaluation, packaging, labeling, and final dispatch. This integrated approach enables brands to work with one manufacturing partner while developing products that align with their desired market positioning.

Our **GMP & ISO-Certified Facility** supports the production of customized soap and cleansing bar formulations with infrastructure designed for reliable and scalable manufacturing. Our formulation specialists work with brands to create products based on their preferred botanical ingredients, fragrance experience, cleansing characteristics, skin feel, appearance, and consumer profile. For wellness-oriented products, the formulation can be developed to deliver a carefully considered sensory experience through the selection of suitable botanical extracts, fragrances, and skin-conditioning ingredients. Our **in-house QC & Microbiology labs** support quality testing and monitoring during relevant production stages to help maintain product consistency.

Our support continues through the final stages of product commercialization, including **packaging design assistance, packaging coordination, label development support, product coding, and compliance management**. Whether you are a wellness startup, spa brand, private-label retailer, hotel and hospitality business, or established personal care company, our turnkey solutions help simplify the process of launching new bath products or expanding an existing portfolio. From the first product brief to the final packaged bar, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands launch and scale their **Chamomile Relaxation Bar** and other customized bath and body products.

Ingredients: Chamomile Extract, Lavender Extract, Oatmeal, Aloe Vera, Rose Water, Shea Butter, Calendula Extract, Jojoba Oil, Honey, Vitamin E

27. Kojic Acid + Vitamin C Brightening Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Brightening Care, Radiance Support, Even-Looking Skin**

Product Description:

The Great Herbal's **Kojic Acid + Vitamin C Brightening Soap** is an active-focused cleansing bar developed for brands seeking to introduce a targeted radiance and complexion-care product into their skincare portfolio. Combining **Kojic Acid and Vitamin C**, the formulation is designed to cleanse the skin while supporting a brighter, fresher, and more even-looking appearance. Its ingredient-led positioning makes it suitable for beauty brands developing specialized cleansing products focused on skin radiance and tone care.

The formulation can be further customized with complementary ingredients such as **Niacinamide, Alpha Arbutin, Glutathione, Licorice Extract, Papaya Extract, Turmeric Extract, Vitamin E, and Aloe Vera** to create differentiated brightening soap concepts for various market segments. Brands can also personalize the active blend, fragrance, color, texture, soap shape, and packaging presentation to align with their product identity and consumer expectations. Whether you are developing an active beauty bar, a radiance-focused cleansing soap, or a specialized skincare collection, The Great Herbal offers customized formulation development and private-label manufacturing solutions. **Looking to launch your own Kojic Acid + Vitamin C Brightening Soap? Partner with The Great Herbal to develop a customized product designed around your brand's product vision.**

Turnkey Manufacturing — End-to-End Support for Active Skincare Soap Brands

At **The Great Herbal**, we help brands develop and scale specialized soap products through a comprehensive turnkey manufacturing model. Our approach brings together the key stages required to take a product from concept to commercial launch, including formulation consultation, active ingredient selection, product development, sampling, manufacturing, quality assessment, packaging, labeling, and final product delivery. By coordinating the complete process, we provide brands with a streamlined manufacturing experience while allowing them to focus on building their brand and market presence.

Our **GMP & ISO-Certified Facility** is equipped to support customized soap production for beauty and personal care brands with diverse product requirements. Our technical team works closely with brands to develop formulations based on their preferred active ingredients, cleansing characteristics, fragrance, appearance, texture, and intended consumer segment. For active-focused products, formulation development can be tailored to achieve the desired

product profile while considering ingredient compatibility and applicable product requirements. Our **in-house QC & Microbiology labs** support quality testing and monitoring across relevant stages of manufacturing to help maintain product consistency.

Beyond formulation and production, we provide support for **packaging development, packaging selection, label coordination, product coding, and compliance management**, helping brands move smoothly toward market readiness. Our services are suitable for startups launching specialized skincare products, private-label retailers developing active beauty collections, and established personal care companies looking to expand their soap portfolio. From the initial product concept to the final packaged bar, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands launch and scale their **Kojic Acid + Vitamin C Brightening Soap** and other customized skincare products.

Ingredients: Kojic Acid, Vitamin C, Niacinamide, Alpha Arbutin, Glutathione, Licorice Extract, Papaya Extract, Turmeric Extract, Vitamin E, Aloe Vera

28. Charcoal + Tea Tree Anti-Acne Soap Third-Party Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Deep Pore Cleansing, Oil Control, Acne-Prone Skin Care**

Product Description:

The Great Herbal's **Charcoal + Tea Tree Anti-Acne Soap** is a targeted cleansing bar developed for brands seeking to create specialized skincare solutions for oily and acne-prone skin. Combining the purifying properties of **Activated Charcoal** with the botanical profile of **Tea Tree Oil**, the formulation is designed to help remove excess oil, dirt, and everyday impurities while providing a fresh and thoroughly cleansed skin feel. Its active cleansing profile makes it suitable for facial and body care ranges focused on oil management, impurity removal, and acne-prone skin support.

The formulation can be customized with complementary ingredients such as **Salicylic Acid, Neem Extract, Zinc PCA, Aloe Vera, Niacinamide, Green Tea Extract, Turmeric Extract, and Witch Hazel** to develop differentiated anti-acne and oil-control soap concepts. Brands can also personalize the active ingredient combination, exfoliation level, fragrance, color, texture, soap shape, and packaging according to their target audience and market positioning. Whether you are developing an acne-care cleansing bar, a charcoal detox-inspired soap, or an oil-control personal care range, The Great Herbal offers customized formulation development and private-label soap manufacturing solutions. **Looking to launch your own Charcoal + Tea Tree Anti-Acne Soap? Partner with The Great Herbal to develop a customized product that aligns with your brand's skincare vision.**

Turnkey Manufacturing — Complete Solutions for Specialized Acne-Care Soap Production

At **The Great Herbal**, we provide end-to-end manufacturing support for brands looking to develop targeted soap products and expand their skincare portfolios. Our turnkey approach is designed to simplify the entire production process by bringing together formulation development, ingredient selection, product sampling, manufacturing, quality evaluation, packaging, labeling, and final delivery. This integrated model allows brands to work with one experienced manufacturing partner while maintaining flexibility across product development and commercialization.

Our **GMP & ISO-Certified Facility** supports customized soap production with manufacturing infrastructure designed for consistent and scalable output. Our formulation specialists collaborate with brands to develop products according to their preferred active ingredients, cleansing performance, oil-control requirements, fragrance, appearance, texture, and target consumer profile. For specialized acne-care products, we can assist with formulation concepts based on suitable ingredients and applicable product requirements. Our **in-house QC & Microbiology labs** support quality testing and monitoring throughout relevant production stages to help maintain consistency across manufacturing batches.

Our support extends beyond production to help brands prepare their products for commercial launch, including **packaging design assistance, packaging selection, label coordination, product coding, and compliance management**. Whether you are a startup launching an acne-care range, a skincare brand introducing a charcoal-based cleansing collection, a private-label retailer, or an established personal care company seeking to scale production, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions**. From the initial formulation brief to the final packaged product, we support brands in launching and scaling their **Charcoal + Tea Tree Anti-Acne Soap** and other specialized skincare products.

Ingredients: Activated Charcoal, Tea Tree Oil, Salicylic Acid, Neem Extract, Zinc PCA, Aloe Vera, Niacinamide, Green Tea Extract, Turmeric Extract, Witch Hazel

- Benefits: **Hygienic Cleansing, Purifying Care, Fresh Skin Feel**

Product Description:

The Great Herbal's **Neem + Tulsi Anti-Bacterial Soap** is a botanical-inspired cleansing bar developed for brands seeking to create hygiene-focused personal care products with the natural appeal of traditional plant extracts. Enriched with **Neem Extract and Tulsi Extract**, the

formulation is designed to cleanse away dirt, sweat, excess oil, and everyday impurities while leaving the skin feeling fresh and thoroughly cleansed. Its botanical positioning makes it suitable for daily-use hygiene collections, family bathing products, herbal-inspired personal care ranges, and specialized cleansing portfolios.

The formulation can be customized with complementary ingredients such as **Tea Tree Oil, Eucalyptus Oil, Turmeric Extract, Aloe Vera, Zinc PCA, Lemongrass Extract, Glycerin, and Natural Essential Oils** to create differentiated cleansing bars for various consumer preferences. Brands can also customize the fragrance, color, texture, soap shape, ingredient combination, and packaging presentation to suit their product positioning. Whether you are developing a botanical hygiene soap, a daily cleansing bar, or a plant-inspired personal care product, The Great Herbal provides customized formulation development and private-label soap manufacturing solutions. **Want to launch your own Neem + Tulsi Anti-Bacterial Soap? Partner with The Great Herbal to develop a customized product that reflects your brand's vision and target market.**

Turnkey Manufacturing — Complete Support for Launching and Scaling Hygiene Soap Products

At **The Great Herbal**, we offer end-to-end manufacturing support for brands looking to develop and scale their soap production with a streamlined and dependable manufacturing partner. Our turnkey service covers the complete product journey, from understanding your initial concept and developing the formulation to ingredient selection, sample creation, commercial production, quality evaluation, packaging, labeling, and final product delivery. This integrated approach allows brands to manage multiple stages of product development and manufacturing through one coordinated service.

Our **GMP & ISO-Certified Facility** is equipped to support the production of customized soap formulations for a variety of personal care and hygiene product concepts. Our formulation specialists work with brands to develop products based on their preferred botanical extracts, cleansing characteristics, fragrance profile, appearance, texture, and target consumer requirements. For products positioned around hygiene and botanical cleansing, the formulation can be tailored to create the desired sensory experience and product identity, while our **in-house QC & Microbiology labs** support quality testing and monitoring throughout relevant manufacturing stages.

We also help brands navigate the final stages of product commercialization with **packaging development support, packaging selection, label coordination, product coding, and compliance management**. Our turnkey solutions are suitable for startups launching their first hygiene product, private-label retailers developing botanical soap collections, established personal care brands expanding their cleansing range, and businesses seeking to scale their soap production. From formulation and manufacturing to packaging and final dispatch, The Great Herbal provides reliable **third-party soap manufacturing, private-label production, and turnkey manufacturing solutions** to help brands successfully launch and grow their **Neem + Tulsi Anti-Bacterial Soap** and other customized personal care products.

31. Aloe Vera and Shea Butter Moisturising Soap Manufacturer

- MOQ: 5000 Units
- Packaging Size: As per brand requirement
- Packaging Type: Customized Soap Box, Wrapper, Carton, or Premium Packaging Options
- Customized Formulations: Available
- Private Labeling: Available
- Turnkey Solutions: Available
- Benefits: **Deep Moisturization, Skin Softness, Gentle Cleansing**

Product Description:

The Great Herbal's **Aloe Vera and Shea Butter Moisturising Soap** is a nourishing cleansing bar formulated for brands seeking to create a rich and comforting bathing experience for consumers who prefer moisture-focused personal care products. Combining **Aloe Vera** with the emollient properties of **Shea Butter**, the soap is designed to cleanse the skin while helping maintain a soft, smooth, and conditioned after-feel. Its moisturizing profile makes it a versatile addition to daily bathing collections, dry-skin-focused body care ranges, premium beauty soaps, and family-friendly personal care portfolios.

The formulation can be customized with complementary ingredients such as **Cocoa Butter, Glycerin, Coconut Oil, Olive Oil, Almond Oil, Oat Extract, Honey, Ceramides, and Vitamin E** to create differentiated moisturizing soap variants for specific market requirements. Brands can also tailor the formulation, fragrance, color, texture, soap shape, and packaging presentation to create a product that reflects their unique identity. Whether you are developing a creamy moisturizing bar, a botanical cleansing soap, or a premium nourishing bath product, The Great Herbal offers customized formulation development and private-label soap manufacturing

solutions. **Planning to launch your own Aloe Vera and Shea Butter Moisturising Soap? Partner with The Great Herbal to develop a customized product aligned with your brand's product vision.**

Turnkey Manufacturing — Complete Support for Your Moisturising Soap Product Line

At **The Great Herbal**, we provide comprehensive turnkey manufacturing support for brands that want to develop new moisturizing soap products or expand their existing bath and body portfolios. Our end-to-end service is structured to cover the complete product development and production cycle, including product consultation, formulation design, ingredient selection, sampling, commercial manufacturing, quality evaluation, packaging coordination, labeling, and final delivery. By bringing these services together, we help brands simplify the process of launching and scaling their soap manufacturing production.

Our **GMP & ISO-Certified Facility** provides the infrastructure required to support customized soap manufacturing for a wide range of personal care concepts. Our formulation specialists work closely with brands to create products based on their desired moisturizing performance, cleansing characteristics, skin feel, botanical ingredients, fragrance profile, and target consumer preferences. For moisturizing soap products, the formulation can be tailored with suitable oils, butters, humectants, and skin-conditioning ingredients to achieve the desired product experience. Our **in-house QC & Microbiology labs** support quality testing and monitoring at relevant stages of production to help maintain batch consistency and defined product specifications.

Our support continues beyond manufacturing with assistance in **packaging design, packaging selection, label coordination, product coding, and compliance management**. Whether you are a startup launching a moisturizing skincare range, a private-label retailer developing a customized soap collection, or an established beauty brand looking to increase production capacity, The Great Herbal provides flexible **third-party soap manufacturing, private-label production, and turnkey solutions**. From formulation development and manufacturing to packaging and final dispatch, we offer end-to-end support to help brands successfully launch and scale their **Aloe Vera and Shea Butter Moisturising Soap** and other customized bath and body products.
